The ICR describes the nature of the information collection and its expected burden. The collection involves recordkeeping requirements and petitions for reconsideration by owners and/or operators of repair stations certificated by the Federal Aviation Administration (FAA).

DATES: Send your comments by May 27, 2025.

ADDRESSES: Comments may be emailed to TSAPRA@tsa.dhs.gov or delivered to the TSA PRA Officer, Information Technology, TSA-11, Transportation Security Administration, 6595 Springfield Center Drive, Springfield, VA 20598-6011.

FOR FURTHER INFORMATION CONTACT: Christina A. Walsh at the above address, or by telephone (571) 227-2062.

SUPPLEMENTARY INFORMATION:

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation will be available at <https://www.reginfo.gov> upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

OMB Control Number 1652-0060; Aircraft Repair Station Security. Under TSA's regulations, aircraft repair stations certificated by the FAA under part 145 and located on or adjacent to an airport, as defined in 49 CFR 1554.101(a)(1) and (2), are required to implement security requirements. Unless located on a military installation, these aircraft repair stations are subject to inspection by TSA. *See* 49 CFR part 1554. These regulations implement section 611 the Vision 100 Century of Aviation Reauthorization Act (the Act). Public Law 108-176 (Oct. 5, 2018) as codified at 49 U.S.C. 44924.

Section 44924 requires the Department of Homeland Security (DHS) to ensure the security of aircraft repair stations. The Act further requires a security review and audit of aircraft repair stations located outside the United States, with a 145-certificate issued by the FAA. *Id.* TSA, on behalf of DHS, is the agency responsible for conducting the relevant tasks associated with this legislation and implementing regulation.

The required security measures in 49 CFR 1554 include designating a TSA point of contact and preventing the operation of unattended large aircraft that are capable of flight. An aircraft repair station owner or operator also is responsible for maintaining updated

employment history records to demonstrate compliance with the regulatory requirements. These records must be made available to TSA upon request. If TSA discovers security deficiencies, an aircraft repair station may be subject to suspension or, in extreme cases, withdrawal of its 145-certificate by the FAA if such deficiencies are not corrected. An aircraft repair station owner or operator may petition for reconsideration (appeal) of a determination by TSA that FAA must suspend or revoke its certificate. TSA uses the collected information to determine compliance with the security measures required under 49 CFR part 1554.

The respondents to this information collection are the owners and/or operators of aircraft repair stations certificated by the FAA under 14 CFR part 145, which is estimated to be over 4,000 aircraft repair stations located within the United States and more than 900 active repair stations located outside the United States.

Respondent aircraft repair stations are required to submit and update security point of contact information, respond to requests to inspect documentation, and may petition for reconsideration. For these activities, TSA estimates that all respondent repair stations will incur a total of 412 hours annually to satisfy the collection requirements.
