This long time contract is not a legitimate contract listed for Vegetable Oil. To monitor startups and shutdowns are fictitious. The price of \$4MM to top off the unauthorized and unnecessary renewal request, which has been illegally obtained should be rejected. The government should also consider the possibility of the removal of the contract immediately based on the YEARS of taxpayer dollars wasted. There is no substantial results to report from this contract to report, regardless of quoted material. This contract is not a subject for debate. This needs to be addressed immediately and revoked, with charges applicable to the parties involved with the agreement.
