

Collection 2120-0690

Non-substantiative changes

The FAA is revising IC 2120-0690 as follows:

The following form has been revised with correction to a checkbox at the top of page 1.

- 8710-11: The current version of the form permits an applicant to select “student” as the category of applicant. However, this may lead to confusion, as the only students using this form are student pilots. The check boxes have been rearranged so that “student” is only a subcategory of “pilot.”
