

HMIRS Web User Feedback Survey Invitation

HMIRS User,

You are invited to participate in the 5 minute HMIRS Web Customer Feedback Survey and your response would be appreciated.

HMIRS has evolved from a stand-alone software to a web-based system, providing greater user access and expanded functionality. The Functional Management Office would like feedback to identify how the system is currently being utilized by its customers to ensure HMIRS is capturing the data valued in the hazmat community. Survey data will provide insight on where to focus future enhancements, unreported defects, and gauge system and support operations performance. To participate in this survey, please click the link below.
