

MyMedications List

Date Last Updated: _____

The **MyMedications List** is a way for you to keep track of all prescription medications, over-the-counter (OTC) medications, vitamins, supplements, herbal products, and traditional cultural medicines that you are currently taking.

How to use your MyMedications List:

- List **every** prescription medication, OTC medication, vitamin, supplement, herbal product, and traditional cultural medicine that you are currently taking.
- Also list things you have stopped taking because of allergic reactions or for other reasons (like side effects, cost, or if it did not work).
- Bring this list with you whenever you go for health care, like to a community health aid, doctor, dentist, pharmacist, or a hospital.
- Update this list any time you make a change to what you take.
- Review this list with your healthcare provider (such as a doctor, pharmacist, nurse practitioner, or physician assistant) to identify medications that may increase your risk of a fall or affect your ability to drive safely.
- Work with your healthcare provider to complete the MyMedications Action Plan and adjust any medications as needed. The MyMedications Action Plan is available at bit.ly/CDC-MedicinesRisk.
