ELI Fellowship End of Year Survey

- Goal of the study (e.g., determine behavioral factors that influence changes in weight over time or evaluate program delivery processes): Ensure that the E-learning Institute (ELI) Fellowship is meeting program goals to support participants and mentors in implementing e-learning best practices, increasing collaboration, and improving the quality of public health training available nationwide.
- Intended use of the resulting data (e.g., provide suggestions for improving community-based programs): The ELI program intends to use the results of this data collection to improve the logistics, communication, and quality of ELI curriculum and live sessions when planning future cohorts.
- Methods to be used to collect (e.g., prospective cohort design; randomized trial; etc.): Web-based survey using Survey Monkey
- The subpopulation to be studied (e.g., school-age children in North Carolina, conference attendees): Public health staff and mentors who participate in the ELI fellowship program.
