- The CDC Import Permit Program, or IPP, regulates the importation of infectious biological materials that could cause disease in humans in order to prevent their introduction and spread into the U.S. The program ensures that the importation of these agents is monitored and that facilities receiving permits have appropriate biosafety measures in place to work with the imported agents. The eIPP information system is the electronic information system through which those seeking import permits apply for the permit. Use of this system is now mandatory for anyone applying for a CDC import permit. The system uses a new, recently updated (and OMB-approved) application that has been modified to better assess biosafety measures at an applicant's facility. Applicants no longer have the option of submitting paper forms, which was the process before the creation of the eIPP information system.
