TITLE OF INFORMATION COLLECTION:

National Electronic Disease Surveillance System Base System 7.x User Training Material Preference Survey

PURPOSE:

The National Electronic Disease Surveillance System (NEDSS) Base System (NBS) is a CDC-developed integrated information system that helps local, state, and territorial public health departments manage reportable disease data and send notifiable disease data to CDC. NBS provides a tool to support the public health investigation workflow and to process, analyze, and share disease-related health information. NBS also provides reporting jurisdictions with a NEDSS-compatible information system to transfer epidemiologic, laboratory, and clinical data efficiently and securely over the Internet.

The NBS team recently launched version 7.0, addressing defects and integrating modernized design interfaces. To ensure effective user adoption, we want to improve training materials by identifying preferred training materials for NBS 7.0 and subsequent versions. Understanding user preferences (videos, user guides, virtual trainings, etc.) will enhance the usability and accessibility of training resources.

DESCRIPTION OF RESPONDENTS:

There are 27 state, local, and territorial jurisdictions that are NBS users. Within a jurisdiction, NBS users can include data analysts, informaticians, and epidemiologists- all health department staff.
