| *Imputability |
| Which best describes the relationship between the transfusion and the reaction? |
| Conclusive evidence exists that the adverse reaction can be attributed to the transfusion. |
| Evidence is clearly in favor of attributing the adverse reaction to the transfusion. |
| Evidence is indeterminate for attributing the adverse reaction to the transfusion or an alternate cause. |
| Evidence is clearly in favor of a cause other than the transfusion, but transfusion cannot be excluded. |
| There is conclusive evidence beyond reasonable doubt of a cause other than the transfusion. |
| The relationship between the adverse reaction and the transfusion is unknown or not stated. |
| Did the transfusion occur at your facility? YES NO |
| Module-generated Designations |
| NOTE: Designations for case definition, severity, and imputability will be automatically assigned in the NHSN |
