SUPPLEMENTARY INFORMATION:

Technical Resource for Incident Prevention (TRIPwire)

TRIPwire (Technical Resource for Incident Prevention) is the Department of Homeland Security’s online, collaborative information-sharing network for bomb technicians, first responders, military personnel, government officials, intelligence analysts, and select private sector security professionals to increase awareness of evolving improvised explosive device (IED) tactics, techniques, and procedures, as well as incident lessons learned and counter-IED preparedness information. Developed and maintained by OBP, the TRIPwire system combines expert analysis and reports with relevant documents, images, and videos gathered from publicly available sources to help users anticipate, identify, and prevent IED incidents.

Users from federal, state, local, and tribal government entities, as well as business and/or other for-profit industries, can register for TRIPwire access. The TRIPwire portal contains sensitive information related to the criminal use of explosives by threat actors, including violent, malicious organizations, which requires a limited, controlled means of dissemination—such as designations of “For Official Use Only,” “Law Enforcement Sensitive,” or “Controlled Unclassified Information.” Therefore, CISA must collect user information in order to verify an individual’s eligibility to access the TRIPwire system.

In addition to new user registrations, CISA will also seek feedback from TRIPwire users via a questionnaire and will request that TRIPwire users revalidate their access status on an annual basis. All information collected/provided pursuant to this ICR will be done so on a strictly voluntary basis.

This collection of information is consistent with CISA’s statutory authorities to provide assistance to federal and non-federal entities to enhance the security and resiliency of critical infrastructure, including the authority provided by 6 U.S.C. 652(c)(5), (11) and 6 U.S.C. 652(e)(1)(C). The previous **Federal Register** notice incorrectly stated the Total Burden Cost stated as \$13,736 when it should have been \$16,333. The Total annualized Government Cost stated as \$7,447 was also incorrect as it should have been \$8,209. The correct costs are also reflected in the Analysis section below.

Abstract: This notice identifies an information collection activity that the Office of Financial Management has submitted to OMB for approval for the Department and its bureaus to continue to collect information from proposed donors relative to their relationship(s) with the Department. The Department and its individual bureaus have gift acceptance authorities. In support of the variety of donation authorities in the Department and increasing numbers of donations, the Department's policy is to ask those proposing to donate gifts valued at \$25,000 or more to provide information regarding their relationship with the Department. The purpose of this policy is to ensure that the acceptance of a gift does not create legal or ethical issues for the Department, its bureaus, or potential donors.

The information will be gathered through the use of a form that collects information relevant to the acceptability of the proposed donation in conformance with the Department's donations policy. The form is completed and certified by the prospective donor then submitted to the Department or its bureau for review. Having donors certify their interactions with the Department gives the staff vetting the proposed donation basic information to be verified, resulting in a more efficient and timely donation review process.
