

Noyce Evaluation Interview Consent

TITLE OF RESEARCH STUDY: NSF Noyce Teacher Scholarship Evaluation

RESEARCH TEAM: Project Director, Dr. Patrik Lundh, (650) 859-3603,
patrik.lundh@sri.com

You are being asked to participate in an evaluation study about the Robert Noyce Teacher Scholarship Program. This evaluation is being funded by the National Science Foundation (NSF) and takes place over a 2-year period.

PURPOSE OF THE STUDY: The purpose of the evaluation is to evaluate the impact of the Noyce program's strategies to recruit and retain STEM professionals and talented undergraduate students majoring in a STEM discipline to become K-12 mathematics and science teachers in high-need schools and school districts; contribute to research and knowledge; and create teacher preparation learning environments and professional development experiences marked by fostering opportunities and leveraging individual skills and experiences.

STUDY PROCEDURES:

We are asking researchers and scholars who worked or are currently working on a project funded by the National Science Foundation's Robert Noyce Teacher Scholarship Grant to participate in one individual interview with the potential for a second follow-up interview. The interview is about your role and experiences with the project. We will ask about the project approaches, challenges, and solutions, as well as people and organizations that support the project. The follow-up interview, if requested, will elaborate on information provided or ask about anything that was missed or needs clarification. Interviews will take place in person, over the phone, or using online video conferencing (such as Zoom) and take 45-60 minutes.

AUDIO RECORDING: We would like to audio-record interviews to ensure the accuracy of these data but you may still participate in the interview(s) if you choose not to be audio-recorded. Recordings will later be transcribed for analysis. We may also use anonymous quotations (i.e., names or other identifying information will not be included) from the recordings in publications and presentations to illustrate our findings.

All transcriptions will be kept in a password-protected file for the duration of the study and only shared with members of the research team. The recordings will be kept with other electronic data in a secure SRI OneDrive account until the transcription phase of this research study has concluded and they will be destroyed.

CONFIDENTIALITY: The data collected from you for this study will be used without identifying you for future research studies that are not described in this consent form. Data collected and themes apparent from this study will be reported to NSF as formative feedback.

COMPENSATION: There is no compensation for participating.

SRI Noyce Evaluation
Interview Consent Form

VOLUNTARY PARTICIPATION AND WITHDRAWAL: You do not have to participate if you do not want to, and if you decide to participate and change your mind you may stop at any time without any penalty or loss of any benefits to which you are entitled. You can stop participating by contacting the Project Director as listed below. Your data will not be used if you end your participation in the study.

QUESTIONS: If you have any questions about the study you may contact the Project Director, Dr. Patrik Lundh at (650) 859-3603 or patrik.lundh@sri.com.

CONSENT: Do you agree to participate in the interview?

- ☐ No, I do not consent to participate
- ☐ Yes, I consent to participate

Do you agree to have your interview audio-recorded during the research study?

- ☐ No, I do not consent to have the interview audio-recorded
- ☐ Yes, I consent to have the interview audio-recorded

I understand that if I do not provide consent to be audio recorded, I can still participate in this interview.
