

## Pancreas Post Transplant Malignancy

The Post-Transplant Malignancy (PTM) record is generated after a malignancy has been reported in the Transplant Recipient Follow-up (TRF) record. The record should be completed by the transplant center responsible for the follow-up of the recipient at the time the cancer was reported. If the patient has more than one follow-up record because of a multi-organ transplant, the malignancy only needs to be reported in one of the follow-up records. If it is reported in more than one, only one PTM record will be generated.

If **Yes** was selected for Post Transplant Malignancies, along with one or more of the post-transplant malignancies listed on the TRF record, the following sections will display in the Post-Transplant Malignancy record: Donor Related, Recurrence of Pretransplant Malignancy, Post Transplant De Novo Solid Tumor and/or Post Tx Lymphoproliferative Disease and Lymphoma.

To change the section of the malignancy record that was generated, access the TRF record and select **No** to the section that is not needed, and select **Yes** to the section of the malignancy record that is needed. To delete the malignancy record, re-access the TRF record and select **No** in the Post Transplant Malignancies field.

**Note:** If no information is available about the malignancy except the fact that they were treated, contact the UNet<sup>SM</sup> Help Desk at 1-800-978-4334. They will have the PTM record validated.

The PTM must be completed within 30 days from the record generation date. See [OPTN/UNOS Policies](#) for additional information. Use the search feature to locate specific policy information on Data Submission Requirements.

To correct information that is already displayed in an electronic record, call the UNet<sup>SM</sup> Help Desk at 1-800-978-4334.

### Recipient Information

**The following fields reported in the recipient's last completed TRF record display.**

**Recipient name:** Verify the last name, first name and middle initial of the transplant recipient.

**Date of birth:** Verify the recipient's date of birth.

**Recipient SSN:** Verify the recipient's social security number.

**Recipient organ:** Verify the type of organ transplanted.

**TRF:** Verify the Transplant Recipient Follow-up record number from which this malignancy record was generated.

**Follow-up code:** Verify the TRF Follow-up Code for the record from which this malignancy record was generated.

**Transplant date:** Verify that the displayed transplant date is correct. The transplant date is determined by the beginning of organ anastomosis. For a multi-organ transplant procedure, the transplant date for each organ is determined by the transplant date of the first organ transplanted.

**Follow-up center:** Verify that the follow-up center listed is responsible for the follow-up of the recipient at the time the cancer was reported.

**Recipient center:** Verify that the transplant center listed is where the transplant procedure took place.

### Donor Related

**This section will only display if Yes was selected for Donor Related on post transplant malignancies listed in the TRF record.**

In most instances the donor does not have a history of cancer and transmission of cancer is unexpected. This occurrence is usually discovered when multiple recipients of organs from a single donor develop the same cancer (e.g. Melanoma). It may also occur when the clinical (not histological) diagnosis of primary brain cancer is made when, in fact, the donor had a metastatic brain cancer from an occult (concealed from observation) primary site.

**Select one or more tumor types:** Select all tumor types that apply to the patient by clicking on the checkbox next to the type.

**Diagnosis date:** Enter the date of diagnosis using the standard 8-digit format of MM/DD/YYYY. The date must fall within the follow-up period and after the transplant date that is displayed. If the month and year for any date is known but the exact day is unknown, enter a 15 for the day (i.e. the middle of the month). This field is **required**.

**Treatment** Information: Select the type of treatment used for this type of tumor by clicking on the checkbox beside the treatment type.

**Surgical resection tumor**

**Chemotherapy:** Select the type of treatment from the drop-down list. If **Other, specify** is selected, enter the name of the treatment in the **Other specify** field. ([List of Chemotherapy codes](#))

CHOP  
MACOP-B  
Pro-Mace-CytaBOM  
M-BACOD

Taxol/5FU/Carb  
Taxol/Adriamycin  
Taxol/Carboplatin  
Taxol/Carboplatin/Zofran  
Topotecan  
Vidarabine/Cisplatin/Dexamethasone

Vincristine  
Vincristine/Prednisone  
VP16  
VP16/Etoposide  
Carboplatin/Gemcitabine  
Other, specify

**Radiation**

**Immunotherapy:** Select the type of treatment from the drop-down list. If **Other, specify** is selected, enter the name of the treatment in the **Other specify** field. ([List of Immunotherapy codes](#))

Hormonal Therapy  
Interferon Alpha  
Prednisone  
Rituximab  
Other, specify

**Other Treatment Specify:** Enter the name of any other tumor treatment that was given.

**Outcome:** Select the outcome from the drop-down list.

Alive, Free of Tumor  
Alive with Tumor  
Dead, due to tumor  
Dead, other causes

**Recurrence of Pretransplant Malignancy**

**This section will only display if Yes was selected for Recurrence of Pretransplant Malignancy on post transplant malignancies listed in the TRF record.**

The patient has a past history of cancer, and develops the same type of cancer post-transplantation. This does not apply to basal cell or squamous cell carcinoma of the skin, unless it recurs in the original site. The patient has a cancer in an explanted (removed) organ (usually liver or maybe kidney), and later develops a recurrence of the same type of cancer. For example, the patient has a hepatocellular carcinoma of the native liver (hepatoma), which is resected at the time of transplantation, and develops a recurrent hepatocellular carcinoma (at any site, at any time).

**Type of pre-existing tumor:** Select type of pre-existing tumor from the drop-down list. This field is **required**.

Skin (Squamous, Basal Cell)  
Skin - Melanoma  
Genitourinary - Bladder  
Genitourinary - Uterine Cervix  
Genitourinary - Uterine Body (endometrial & choriocarcinoma)  
Genitourinary - Vulva  
Genitourinary - Ovarian  
Genitourinary - Testicular  
Genitourinary - Prostate  
Genitourinary - Kidney  
Gastrointestinal - Stomach  
Gastrointestinal - Small Intestine  
Gastrointestinal - Carcinoid  
Gastrointestinal - Colo-Rectal  
Gastrointestinal - Liver/Biliary Tract (incidental time of hepatectomy)  
Gastrointestinal - Liver/Biliary tract, not incidental  
Gastrointestinal - Pancreas  
Thyroid  
Breast

Tongue/Mouth,Pharynx  
Larynx  
Lung (include bronchial)  
Leukemia  
Lymphoma  
Other Cancer, Specify

**If Other Cancer, Specify:** Enter the type of pre-existing tumor in the **Other specify** field.

**Date of recurrence (post-tx):** Enter the date, using the standard 8-digit format of MM/DD/YYYY, the cancer recurred. This date must be after the transplant date and fall within the follow-up period that is displayed. This field is required.

#### Post Transplant De Novo Solid Tumor

**This section will only display if Yes was selected for Post Transplant De Novo Solid Tumor on post transplant malignancies listed in the TRF record.**

This includes all new malignant tumors except Post Transplant Lymphoproliferative Disease. This includes all skin cancers, sarcomas, adenocarcinomas, hematological malignancies, and many cancers with special names. It does not include benign tumors such as nevi, adenomas, or fibromas. Usually, the description should include the type of cancer (e.g. squamous cell, adenocarcinoma), and the organ involved.

**Select the one or more tumor types:** Select all tumor types that apply to the patient by clicking on the checkbox next to the type. This field is **required**.

**Skin:** If **squamous cell**, **basal cell** and/or **melanoma** skin tumors are selected, complete the following section:

**Sites:** Select the site(s) affected by clicking on the checkbox next to the site.

Single  
Multiple

**Site Location:** Indicate the area by selecting **Lips/Head/Neck**, **Extremities** or **Trunk**.

**Spread:** Indicate if the skin malignancy has spread by selecting **None**, **Nodes** and/or **Other**. If **Other** is selected, enter the location.

**# of occurrences:** Enter the number of occurrences during the follow-up period. If the number of occurrences during the follow-up period is unavailable, select the reason from the status (ST) drop-down list (**Missing**, **Unknown**, **N/A**, **Not Done**).

**Kaposi's sarcoma: cutaneous**

**Kaposi's sarcoma: visceral**

**Brain:** Select the specific type of brain tumor from the drop-down list. If **Other Specify** is selected, enter the type of tumor in the **Other specify** field. ([List of Brain Tumor codes](#))

Astrocytoma  
Medulloblastoma  
Glioblastoma Multiforme  
Neuroblastoma  
Meningioma, Malignant  
Meningioma, Benign  
Angioblastoma  
Other Specify

**Renal carcinoma - Specify Site(s):** Enter the site(s) in the space provided.

**Carcinoma of vulva, perineum or penis, scrotum**

**Carcinoma of uterus:** Select the type of carcinoma from the drop-down list. ([List of Uterine Carcinoma codes](#))

- Cervix, invasive
- Cervix, in situ
- Body, Endometrium

Ovarian

Testicular

Esophagus

Stomach

Small intestine

Pancreas

Larynx

Tongue, throat

Thyroid

Bladder

Breast

Prostate

**Metastatic Liver Tumor - Specify Original Site:** Select the original site from the drop-down list. If **Other** is selected, enter the site in the **Other specify** field. ([List of Metastatic Liver Tumor codes](#))

- Stomach Adenocarcinoma
- Colon Adenocarcinoma
- Breast Carcinoma
- Pancreas Carcinoma
- Bronchial Carcinoma
- Carcinoid (Neuroendocrine)
- Other

**Lung (include bronchial):** Indicate either **Small Cell** or **Non-small Cell**.

**Leukemia:** Select the leukemia type from the drop-down list. ([List of Leukemia codes](#))

- AML (acute myelocytic leukemia)
- ALL (acute lymphocytic leukemia)
- MDS (myelodysplasia syndrome)
- CML (chronic myelocytic leukemia)
- CLL (chronic lymphocytic leukemia)
- Other

**Sarcomas (excluding Kaposi's)**

**Site(s):** Enter the site(s).

**Specify type:** Select the type of sarcoma from the drop-down list. If **Other** is selected, enter the type in the **Other specify** field. ([List of Sarcoma codes](#))

- Fibrosarcoma
- Liposarcoma
- Leiomyosarcoma
- Rhabdomyosarcoma
- Angiosarcoma
- Malignant Hemangiopericytoma

Neurofibrosarcoma  
Neuroblastoma  
Chondrosarcoma  
Osteosarcoma  
Ewing's sarcoma  
Other

If **Other Cancers** is selected, enter the **Site(s)** and the type of cancer in the spaces provided (this field is required).

**Primary Unknown:** Select if the type of tumor is unknown.

**The Treatment Information must be completed when a type of tumor is selected from the Post Transplant De Novo Solid Tumor section of the record. All applicable fields must be completed.**

#### Post Transplant Lymphoproliferative Disease and Lymphoma

**This section will only display if Yes was selected for Post TX Lymphoproliferative Disease and Lymphoma on post transplant malignancies listed in the TRF record.**

Lymphoid growths that occur in organ transplant patients, in which evidence of Epstein-Barr virus (EBV) can be demonstrated; a family of lesions that straddle the border between infection and neoplasia (tumors). The spectrum runs from infectious mononucleosis to clonal proliferation of lymphoid cells to gross tumor formation and malignancy. PTLDs must be distinguished from sporadic lymphomas or non-EBV-associated lymphadenopathies, which may also be seen in the transplant population.

**Diagnosis date:** Enter the date using the standard 8-digit format of MM/DD/YYYY. The date must fall within the follow-up period and after the transplant. This field is **required**.

**Pathology:** Select the pathology of the disease from the drop-down list. This field is **required**. If **Other, Specify** is selected, enter the disease in the **Other Specify** field. ([List of Pathology codes](#))

Polymorphic Hyperplasia  
Polymorphic PTLD(lymphoma)  
Monomorphic PTLD(lymphoma)  
Multiple Myeloma, Plasmacytoma  
Hodgkin's Disease  
Other, Specify

**Public Burden Statement:** The private, non-profit Organ Procurement and Transplantation Network (OPTN) collects this information in order to perform the following OPTN functions: to assess whether applicants meet OPTN Bylaw requirements for membership in the OPTN; and to monitor compliance of member organizations with OPTN Obligations. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection is 0915-0157 and it is valid until XX/XX/202X. This information collection is required to obtain or retain a benefit per 42 CFR §121.11(b) (2). All data collected will be subject to Privacy Act protection (Privacy Act System of Records #09-15-0055). Data collected by the private non-profit OPTN also are well protected by a number of the Contractor's security features. The Contractor's security system meets or exceeds the requirements as prescribed by OMB Circular A-130, Appendix III, Security of Federal Automated Information Systems, and the Departments Automated Information Systems Security Program Handbook. The public reporting burden for this collection of information is estimated to average 0.27 hours per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this

OMB No. 0915-0157; Expiration Date: XX/XX/202X

collection of information, including suggestions for reducing this burden, to HRSA Information Collection Clearance Officer, 5600 Fishers Lane, Room 14N39, Rockville, Maryland, 20857 or [paperwork@hrsa.gov](mailto:paperwork@hrsa.gov).
