Donor Organ Disposition

The disposition of organs from every donor is recorded through the Donor Organ Disposition Data function in UNet[SM]. This information must be submitted within five working days from the procurement date.

OPO: OPO name. This field is populated automatically by the system.

Donor Hospital: Donor hospital name. This field is populated automatically by the system.

Histocompatibility lab: Select the name of the histocompatibility lab from the dropdown menu.

Donor name: The donor name is populated automatically by the system. The information cascades from the donor record.

Date of referral call: Enter the date of referral call (MM/DD/YYYY).

Recovery date: Enter the date (MM/DD/YYYY) the donor entered the operating room for the purpose of organ recovery. If the operation was started in the evening and concluded the next day, enter the date the operation began.

Were any organs recovered?:

Yes
No

If **No** is selected, the DDR will be suspended. If **Yes** is selected, then the disposition for at least one organ type must be **Recovered for TX but not TX** or **Transplanted** in order for a DDR to generate.

Provide the following disposition information for the applicable organ.

Organs:

Right Kidney	**Right Lung**
Left Kidney	**Left Lung**
Dual/En-bloc Kidney	**Double/En-bloc Lung**
Pancreas	**Abdominal Wall**
Pancreas Segment 1	**External Male Genitalia**
Pancreas Segment 2	**Head and Neck**
Liver	**Lower Limb**
Liver Segment 1	**Musculoskeletal Composite Graft Segment**
Liver Segment 2	**Other Genitourinary**
Intestine	**Spleen**
Intestine Segment 1	**Upper Limb**
Intestine Segment 2	**Uterus**
Heart	**Vascularized Gland**

Disposition (supply code): Select from the dropdown menu.

Authorization Not Requested

Authorization Not Obtained
Organ Not Recovered
Recovered Not for Tx
Recovered for Tx but Not Tx
Transplanted

Code: Select the applicable code from the dropdown menu.

Match ID: Match ID of the match that was used to allocate the organ. Select from the dropdown menu.

Tx Center: Transplant center code of the recipient center. Select from the dropdown menu.

Extra Vessel Sent: Check the checkbox if an extra vessel was sent. Extra vessels are taken during the organ procurement process of deceased or living donors with the intent to use them to reconstruct vasculature of a transplanted organ. Not everything directly attached to the organ (without surgical modification) to be transplanted is considered an extra vessel. Extra vessels are routinely taken from areas not immediately connected to the transplantable organ (i.e., iliac artery or vein, aorta, carotid artery or jugular vein, etc.)

Was authorization for at least one VCA organ requested?:

Yes
No

Specify the authorization not requested code:

Donor Age
Non-heart Beating Donor
Acute/chronic Renal Failure
Donor Quality
Donor ABO
Other Specify
