

Discrepant HLA Typings Reporting Form Instructions

According to OPTN Policy, donors and recipients with discrepant human leukocyte antigens (HLA) typing results will be flagged in UNetSM, and laboratories must resolve discrepant HLA typing results within 30 days of notification of discrepant HLA typing result. Notification on the number of unresolved discrepancies is displayed on the TIEDI home page. Policy also requires lab directors of designated staff to contact other lab directors or designated staff to resolve discrepancies.

The Discrepant HLA Typings Report is available to labs to view kidney, kidney-pancreas, or pancreas deceased donor(s) and/or recipient(s) for which discrepant HLA typing results have been entered, where the recipient was transplanted on or after October 25, 1999. The report includes only discrepancies found for the A, B, DR and Bw4 and Bw6 antigens.

Outstanding Donor Discrepancies

Donor ID: Donor ID is displayed.

Record: Record name is displayed.

HLA Typing Result: HLA typing result is displayed.

Lab Code: Lab code is displayed.

Class 1 Test Date: Class 1 test date is displayed.

Class 2 Test Date: Class 2 test date is displayed.

Resolved Reason for Discrepancy: If resolution is reached, select the resolved reason for discrepancy from the dropdown menu. If the discrepancy cannot be resolved, check **Discrepancy Not Resolvable**.
