Oklahoma

Program: Core SIPP  
Task: Year 3 Annual Progress Report

**Description**  
The APR is divided by sections. One person can check-out and edit a section at a time. The maximum section check-out time for editing is 4 hours. After 4 hours someone else can check-out the section for editing.

Submit your APR to CDC once it is complete. If you need to make updates before the deadline, you can submit again.

Each time you submit, an email notification will be sent to your CDC State Support team as well as Core SIPP team members in your state who have access to the Partner's Portal.

Check the Core SIPP SharePoint site for training videos and an updated user manual. For any questions or access issues, please email [partnersupport@cdc.gov](mailto:partnersupport@cdc.gov).

Due Date: 3/31/2022 - 3 days remaining

OMB No. 0925-0065  
Exp. Date: 08/30/2022

Public reporting burden of this collection of information is estimated at 12 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to: CDC Information Collection Review Office, 1600 Clifton Road, NE, 10th St., N.E., Atlanta, GA 30333, April 19th, 2022-0925-0065.

## Implementation Capacity Rubric

Each base strategy has a rubric to complete, with 9-11 prompts to complete (checklist or radio button selection).

## Checklist:

### Strategy 1: Engage in Robust Data/Surveillance for Public Health Action

Your self-assessment on the following prompts will help us understand your organization's Core SIPP work and process. This assessment is not intended to score or compare you to other jurisdictions, but rather to get an accurate sense of your own unique program. For each prompt below, check any of the items that apply to your Core SIPP work **for this reporting period**. We understand that in many programs, Core work is connected to other programmatic work you are doing. As much as reasonably possible, consider the connections to your Core work and the activities you have identified through Core when thinking about your capacity. Even though you may not be implementing programs, you are still implementing new strategies, activities, and processes to support work through your state, communities, and partners. Think through the activities you are actively doing and the processes you use to support them. Some items may not apply to you or your work, and that's okay, as this helps measure your capacity over time relative to your own work. Try to give an accurate estimate of items that have been fully completed this specific period. We do not expect most items to apply to every program; it is far more important that we understand genuine change over time than see more items checked.

Once you finish checking items for each prompt, you will see a rubric that estimates your current work for that item. This rubric can also be printed for an overall review.

### Improving and Sustaining Surveillance Systems Access

#### 1. Access to Surveillance and Epidemiological Expertise

[Edit](#)

 Please select from the following options below and click the Complete Checklist button to display the Rubric for this activity

- Select the **None of the above** option from the checklist if none of the following options are applicable

- ☐ Has access to an epidemiologist
- ☐ Works with epidemiologist and integrates surveillance expertise to:
  - ☐ Inform data collection and reporting needs
  - ☐ Access and secure data
  - ☐ Store and manage data (including any data merging or blending needed)
  - ☐ Conduct analyses
  - ☐ Improve data validity and timeliness
  - ☐ Improve analyses
  - ☐ Create data products
- ☐ Creates a culture around epidemiology with close partnerships to experts and integration of surveillance
- ☐ Ensures continued access to epidemiological expertise now and in the future by establishing:
  - ☐ Hiring practices
  - ☐ Contractual language
  - ☐ Regular meeting practices
- ☐ None of the above currently apply

**Additional notes regarding access to expertise:**

Please use this text box if you have additional notes regarding access to expertise:

### Radio Button:

Expanding Topical Expertise

9. Adverse Childhood Experiences (ACEs) Specific Surveillance Capacity

+

Cancel

The first 8 prompts have provided a general frame for your overall surveillance capacity across different injury topic areas. However, your capacity for different topic areas likely differs a bit due to challenges with accessing and securing data, conducting specific analyses, and being able to align with specific projects. As such, please think over the prompts you have just answered above and select one of the following to estimate your overall capacity for ACEs.

☐ ACEs Data/Surveillance System Initiation (just beginning to build ACEs surveillance)

☐ ACEs Data/Surveillance System Emergence (ACEs surveillance work is growing but still new)

☐ ACEs Data/Surveillance System Expansion (ACEs surveillance work is becoming established and effective)

☐ ACEs Data/Surveillance System Integration (ACEs surveillance work is well-integrated in the program)

☐ ACEs Data/Surveillance System Sustainability (ACEs surveillance work is integrated and sustaining in the program)

Please use this text box if you have additional notes regarding ACEs surveillance:
