

Form Approved

OMB NO: 0920-1365

Exp. Date: 7/31/2025 Public reporting burden of this collection of information is estimated at 5 hours per response information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a unique identifier. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/Information Collection Review Office, 1600 Clifton Road, NE, MS D-74.

This spreadsheet is to be used for the calculation and submission of the death related Injury Indicator Rates for 2022.

Please keep the following items in mind as you complete the spreadsheets.

- The spreadsheet should be completed after individual indicator case counts have been determined using the data.
- Only cells outlined in red will accept data input. Information copied on subsequent pages does not appear in a red box. To update information in these cells, you must return to the original red-outlined cell.
- Please answer all the questions on the background information sheet.
- Please do not insert lines into the spreadsheet pages. Additional information may be highlighted in footnotes.
- All case count cells should be populated.
 - o Small case counts (<5) will be suppressed at CDC.
 - o Age-adjusted rates, while calculated on this spreadsheet, will not be presented for categories with small case counts.
- Rates will not auto-calculate until the population data has been entered. The default rate of 0 will be replaced with the calculated rate.
- The spreadsheet file should be renamed inserting the appropriate state postal abbreviation into the file name. If more than one submission is required, then the 01 should be updated to reflect submission number.
