

2024 ORS Annual Evaluation Survey - Drug Intelligence Officers

Thank you for participating in this brief survey about your participation in the Overdose Response Strategy (ORS) program. With this annual survey, we are seeking to understand the components of partnership, networks and mutually reinforcing activities that lead to shared, effective efforts to reduce drug overdoses and save lives. The results will be used to measure the progression and impacts of this unique partnership. We're asking that you respond to the questions based on how the ORS program operated in 2024. The survey will take approximately 30 minutes to complete, and your responses are completely anonymous. The data collected from this survey will be summarized and no individual person will be identifiable from the summarized results. If you have questions or need help with the survey, please contact ORSperformance@cdcfoundation.org. We truly value your experience and feedback!
