The instructions do not provide a timeline for completion of the referral and pre-waitlist forms. What is a reasonable time from referral to submitting the form? What is a reasonable time from the committee review decision to submit the form? Who is determining this part of the process?

Will the information in these documents be evaluated by the SRTR contracted provider in the same manner as the other information that is entered in the Secure Enterprise system?

Where will this data be stored once it is submitted? A system separate from Secure Enterprise? Who is transferring the data from the forms to this other system or will this be a direct entry function for the transplant centers?

Will there be public reporting on the data as we have with the bi-annual reports published by the SRTR for each transplant center and OPO?

Batching this information per month or by quarter would reduce the burden on transplant centers that are already burdened with data collection and documentation.

Will the referral and pre-waitlist forms be linked by the SSN or unique ID? How will you remove duplicate entries submitted in error? The majority of the information fields are repeated and it would be helpful if they could pre-populate from the referral form to the pre-waitlist form.
