3. Methods to maximize Response Rates and Deal with No Response.....	2
4. Tests of Procedures or Methods to be Undertaken.....	2
5. Individuals Consulted on Statistical Aspects and Individuals Collecting and/or Analyzing Data	2

CDC’s One Health Office will be using statistical methods to view trends in the data. The purpose of the collection is not to make statistical generalizations beyond the particular respondents.

1. Respondent Universe and Sampling Methods

OHZDP workshop organizers and attendees are included in the respondent universe. Voluntary and convenience-based response sampling will be used.

2. Procedures for the Collection of Information

Monitoring and evaluation questions will be administered electronically. Respondents are chosen based on participation type in the OHZDP workshop (workshop organizer or workshop attendee). Workshop organizers are given advanced notice that there will be optional follow up surveys for them to assess impact over time.

3. Methods to maximize Response Rates and Deal with No Response

The OHZDP Facilitator Training Survey and OHZDP Participant Survey are administered during the facilitator training or workshop, respectively. Time in the agenda is allocated for participants to complete the surveys. If participants do not complete the surveys, no follow up will be conducted.

For the OHZDP Next Steps Tracker and OHZDP Post Workshop Survey, up to two notifications at the time each survey is meant to be completed will be administered. For the OHZDP Retrospective Survey, workshop organizers will be emailed for optional participation. Up to two follow up e-mails will be administered to these workshop organizers in the case of no response.

4. Tests of Procedures or Methods to be undertaken

Pilot testing of data/information collection forms and surveys have been conducted for OHZDP Facilitator Training Survey, OHZDP Participant Survey, and the OHZDP Baseline Survey. Pre-tests for the other activities are planned internally within CDC's One Health Office.

5. Individuals Consulted on Statistical Aspects and Individuals Collecting and/or Analyzing Data

The following individuals have been consulted throughout the development and design of this data collection.

- Casey Barton Behraves, 404-639-0367, dlx9@cdc.gov
- Colin Basler, 404-639-5277, wjq3@cdc.gov
- Brandon Mecikalski, 404-639-0367, myv0@cdc.gov
- Grace Goryoka, 404-718-3466, lie0@cdc.gov
