ORPB	<p>Hispanic pregnant women;</p> <p>Hispanic population</p>	<p>CDC now advises people at high risk for Listeria to avoid eating queso fresco-type cheeses, whether made from pasteurized or unpasteurized (raw) milk. This update is based on a review of recent outbreak data.</p> <p>You are at high risk for Listeria if you</p> <ul style="list-style-type: none"> <li>P are pregnant</li> <li>P are 65 or older</li> <li>P have a weakened immune system</li> </ul> <p>For people who are pregnant, Listeria can cause pregnancy loss, premature birth, or a life-threatening infection in their newborn.</p> <p>For people who are 65 years or older or who have a weakened immune system, Listeria often results in hospitalization and sometimes death.</p> <p>Learn more:  <a href="https://www.cdc.gov/listeria/prevention.html">https://www.cdc.gov/listeria/prevention.html</a> </p> <div data-bbox="558 1325 735 1877"> </div>	Side by side of message and carousel graphics	<ul style="list-style-type: none"> <li>- In your own words, what does this message tell you?</li> <li>- Initial thoughts or feelings?</li> <li>- Would you follow the recommendations (why/why not)?</li> <li>- Overall, what do you like or dislike about the message and graphic?</li> </ul>

				
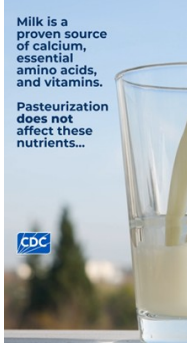

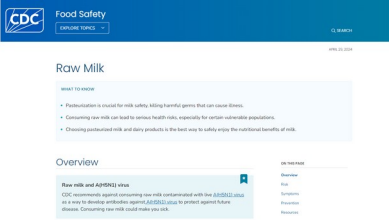

Cait Lutfy, Samantha Williams, Mitsuru Toda/ MDB	Pregnant individuals  Immunocompromised individuals	<p>Blastomycosis is a fungal infection that anyone can get from the environment in certain parts of the United States. Although most people who breathe in the spores do not get sick, some people will develop symptoms like fever and cough, and the infection can sometimes become serious if it is not treated. Certain groups of people may be at greater risk for developing severe blastomycosis, such as people who have weakened immune systems and pregnant people.</p> <p>It may not be possible to completely avoid being exposed to the fungus that causes blastomycosis in areas where it is common in the environment. People at higher risk of infection can avoid activities that disrupt soil, like yardwork, to help protect themselves.</p>		<ul style="list-style-type: none"> <li>- How do you feel after hearing this?</li> <li>- Is there any information that you feel is missing or that you'd like to know more?</li> <li>- After hearing this message is there anything you would change in your activities or behaviors?</li> </ul>
Samantha Williams, Mitsuru Toda/ MDB	Pregnant individuals  Older adults  Immunocompromised individuals	<p>Coccidioidomycosis or Valley fever is a fungal infection that anyone can get from the environment in parts of the southwestern United States. Although most people who breathe in the spores do not get sick, some people will develop symptoms like fever and cough, and the infection can sometimes become serious if it is not treated.</p>		<ul style="list-style-type: none"> <li>- How do you feel after hearing this?</li> <li>- Is there any information that you feel is missing or that you'd like to know more?</li> <li>- After hearing this message is there</li> </ul>

		<p>Certain groups of people may be at greater risk for developing severe Valley fever, such as adults aged 60 and older, who have weakened immune systems and pregnant people.</p> <p>It may not be possible to completely avoid being exposed to the fungus that causes coccidioidomycosis in areas where it is common in the environment. There are some ways to help reduce your risk of getting sick, like avoiding construction sites and yardwork, staying inside during dust storms, and carefully cleaning any skin injuries.</p>		<p>anything you would change in your activities or behaviors? Why/why not?</p>
<p>Samantha Williams, Mitsuru Toda/ MDB</p>	<p>Caregivers of children under 5, Immunocompromised individuals</p> <p>Older adults</p>	<p>Histoplasmosis is a fungal infection that anyone can get from the environment in certain parts of the United States. Although most people who breathe in the spores do not get sick, some people will develop symptoms like fever and cough, and the infection can sometimes become serious if it is not treated. Certain groups of people may be at greater risk for developing severe histoplasmosis, such as people who have weakened immune systems, infants, and adults aged 55 and older.</p> <p>It can be difficult to completely avoid the fungus that causes histoplasmosis. To help reduce your risk of getting sick, avoid any exposures to bat or bird droppings, cleaning chicken coops, exploring caves, and cleaning, remodeling, or tearing down old buildings.</p>		<ul style="list-style-type: none"> <li>- How do you feel after hearing this?</li> <li>- Is there any information that you feel is missing or that you'd like to know more?</li> <li>- After hearing this message is there anything you would change in your activities or behaviors? Why/why not?</li> </ul>
<p>Cait Lutfy/ MDB</p>	<p>Older adults</p> <p>Immunocompromised</p>	<p>In recent years some there have been outbreaks of <i>Candida auris</i> (C.</p>		<ul style="list-style-type: none"> <li>- In your own words, what does this message tell you?</li> <li>- Initial thoughts or</li> </ul>

		<p><i>auris</i>) in healthcare settings (hospitals, skilled nursing facilities, long-term acute care settings, etc.).</p> <p><i>C. auris</i> can cause severe even deadly, infections in some patients. Other patients can get <i>Candida auris</i> (<i>C. auris</i>) on their skin or body without getting sick or having symptoms, which is called “colonization.”</p> <p>Both people who are sick and people who are colonized can spread <i>C. auris</i> from their bodies on to surfaces and objects around them. <i>C. auris</i> can live on surfaces and objects for a long time and make other patients sick.</p> <p>Some healthcare facilities screen patients for <i>C. auris</i> even if they do not have symptoms. <i>C. auris</i> screening helps protect all patients and prevent outbreaks.</p>		<p>feelings?</p> <ul style="list-style-type: none"> <li>- Is there more information you would want to know after hearing this message?</li> <li>- Can you explain why someone without any symptoms who is not sick be tested for <i>C. auris</i>?</li> </ul>
Mmesoma/OD	Individuals interested in health and wellness	<p>Pasteurization is crucial for milk safety because it kills harmful germs. Enjoy the nutritional benefits of milk without taking unnecessary risk – choose pasteurized milk.</p> <p><a href="https://www.cdc.gov/food-safety/foods/raw-milk.html">https://www.cdc.gov/food-safety/foods/raw-milk.html</a></p>	 <p>Video: <a href="#">350800-C_NCEZID_WEB_Raw-Milk_Social-Post-Reels.mp4</a></p>	<ul style="list-style-type: none"> <li>- In your own words, what does this message tell you?</li> <li>- Initial thoughts or feelings?</li> <li>- Would you follow the recommendations (why/why not)?</li> <li>- Overall, what do you like or dislike about the message and graphic?</li> </ul>

Mmesoma/OD	Individuals interested in health and wellness	<p>Did you know drinking raw milk may result in illnesses, hospitalization and even death? Pasteurization removes disease-causing germs by heating milk to a high enough temp for a certain length of time. Enjoy the nutritional benefits of milk without taking unnecessary risk – choose pasteurized milk and dairy products.</p> <p><a href="https://www.cdc.gov/food-safety/foods/raw-milk.html">https://www.cdc.gov/food-safety/foods/raw-milk.html</a></p>	 <p>Video: <a href="#">350800-D_NCEZID_WEB_Choose-Milk_Social-Post-Reels.mp4</a></p>	<ul style="list-style-type: none"> <li>- In your own words, what does this message tell you?</li> <li>- Initial thoughts or feelings?</li> <li>- Would you follow the recommendations (why/why not)?</li> <li>- Overall, what do you like or dislike about the message and graphic?</li> </ul>
Mmesoma/OD	Individuals interested in health and wellness	<p>Pasteurization kills harmful germs like <i>Campylobacter</i>, <i>Cryptosporidium</i>, <i>E. coli</i>, <i>Listeria</i>, <i>Brucella</i>, and <i>Salmonella</i>. It does not meaningfully affect the nutritional quality of milk. Stay healthy by choosing pasteurized milk and dairy products.</p> <p><a href="https://www.cdc.gov/food-safety/foods/raw-milk.html">https://www.cdc.gov/food-safety/foods/raw-milk.html</a></p>	 <p>Video: <a href="#">350800-B_NCEZID_WEB_Milk-Source_Social-Post-Reels.mp4</a></p>	<ul style="list-style-type: none"> <li>- In your own words, what does this message tell you?</li> <li>- Initial thoughts or feelings?</li> <li>- Would you follow the recommendations (why/why not)?</li> <li>- Overall, what do you like or dislike about the message and graphic?</li> </ul>
