Sample Performance Measure Specifications Form

Phish-Block Specifics: Measure, Analyze, and in Component A)														
Performance Measure Characteristics					Measurement Specifications					Data Source Attributes			Timeline and Target	
Performance Measure (PM): Reference or related term Component A) is measured	Definition and Scope of the Measure	Measurement Unit	Frequency of Reporting	Unit of Measurement	Measurement Description	Frequency of Reporting	Key Specification	Reported Unit	Reported Frequency	Data Source Category or Source	Key Reporting Frequency	Timeline	Baseline Value	Target Value
PM STD-1	Content analysis and filtering rate	Percent of malicious content detected and filtered out of total content processed	Percentage	Percentage	Number of malicious content items detected and filtered out of total content processed	Percentage	Key specification: The measure is calculated as the number of malicious content items detected and filtered out of the total content processed, expressed as a percentage.	Percentage	Monthly report	STD-01	Quarterly	3 months	N/A	N/A
PM STD-2	Security Incident Response Time (SIRT)	Mean time to detect and respond to security incidents	Percentage	Percentage	Number of security incidents detected and responded to within the SIRT threshold	Percentage	Key specification: The measure is calculated as the mean time to detect and respond to security incidents, expressed as a percentage.	Percentage	Monthly report	STD-02	Quarterly	3 months	N/A	N/A
PM STD-3	Integration of Security Incident Response Time (SIRT) with Security Incident Response Time (SIRT)	Mean time to detect and respond to security incidents	Percentage	Percentage	Number of security incidents detected and responded to within the SIRT threshold	Percentage	Key specification: The measure is calculated as the mean time to detect and respond to security incidents, expressed as a percentage.	Percentage	Monthly report	STD-03	Quarterly	3 months	N/A	N/A
PM STD-4	Integration of Security Incident Response Time (SIRT) with Security Incident Response Time (SIRT)	Mean time to detect and respond to security incidents	Percentage	Percentage	Number of security incidents detected and responded to within the SIRT threshold	Percentage	Key specification: The measure is calculated as the mean time to detect and respond to security incidents, expressed as a percentage.	Percentage	Monthly report	STD-04	Quarterly	3 months	N/A	N/A
PM STD-5	Integration of Security Incident Response Time (SIRT) with Security Incident Response Time (SIRT)	Mean time to detect and respond to security incidents	Percentage	Percentage	Number of security incidents detected and responded to within the SIRT threshold	Percentage	Key specification: The measure is calculated as the mean time to detect and respond to security incidents, expressed as a percentage.	Percentage	Monthly report	STD-05	Quarterly	3 months	N/A	N/A
PM STD-6	Integration of Security Incident Response Time (SIRT) with Security Incident Response Time (SIRT)	Mean time to detect and respond to security incidents	Percentage	Percentage	Number of security incidents detected and responded to within the SIRT threshold	Percentage	Key specification: The measure is calculated as the mean time to detect and respond to security incidents, expressed as a percentage.	Percentage	Monthly report	STD-06	Quarterly	3 months	N/A	N/A
