If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe? [X] Yes [] No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

Potential participants are drawn from a national panel of individuals who have opted in to participate in focus groups on various topics. The contractor KRC Research will direct a subcontracted panel provider to distribute an invitation to screen for the focus groups to members of its panel, starting with those individuals whose panel profiles suggest they are most likely to qualify (e.g., have known

travel habits). When an individual receives the invitation to screen, they will either complete a screening questionnaire online (Attachment 1) or via the phone in a call with a panel provider staff member. Individuals must pass the screening questionnaire without being disqualified based on their answers or due to quotas reached on certain characteristics.

A total of 24 consumers (for three focus groups) will be purposively selected from this pool of eligible participants. Within the parameters of each audience, participants will be selected to ensure a variety of demographic and other variables (e.g., age, community type, income, education, pregnancy status).
