

# SHARP PM 3.2 Implementation of Antibiotic Stewardship Activities

Recipient \_\_\_\_\_

Antibiotic Stewardship (SHARP Project III) Performance Measures - Measure 2

Purpose: The purpose of this measure is to capture details on all Stewardship activities planned and/or implemented during this reporting period (August 1st, 2024 - December 31st, 2024).

**INSTRUCTIONS:** One form should be completed for EACH activity. To add a NEW activity, click "Save and Add New Instance", which is located at the bottom of this form.

This form will only ask about the details of a single stewardship activity. Please fill out another form to report on an additional stewardship activity (e.g., if your jurisdiction is engaged in three stewardship activities, submit Measure 2 three times, once for each activity).

To see a complete list of all questions and answer choices, download the PDF attachment.

[Attachment: "Performance Measures\_2024\_UPDATED.pdf"]

## Measure 2: Implementation of Antibiotic Stewardship Activities

Title of Activity: \_\_\_\_\_

Summary of activity (up to 300 words):

Please provide a brief summary of the activity. Include any key actions, data sources, partners, outcomes, timelines, and personnel involved.

Stage of implementation of activity:

- Planning  
 Ongoing  
 Completed  
 Evaluation

- Planning: activity has not yet been initiated or implemented
- Ongoing: activity is actively being implemented
- Completed: activity has been completed
- Evaluation: activity has been completed and is being evaluated for impact

Healthcare setting where activity is implemented:

- Outpatient Setting  
 Acute Care Setting  
 Long-term Care Setting  
 Other Setting

If activity is across multiple settings, select more than one setting.

Outpatient Setting:

- Primary care clinic  
 Outpatient specialty and subspecialty  
 Emergency department  
 Retail health clinic  
 Urgent care clinic  
 Other

Type of Outpatient Setting: (Check all that apply)

If Other, please specify:

---

Acute Care Setting:

- General acute care hospital  
 Critical access hospital  
 Children's hospital  
 Long-term acute care hospital  
 Other

Type of Acute Care Setting: (Check all that apply)

If Other, please specify:

---

Long-Term Care Setting:

- Nursing home  
 Skilled-nursing facility  
 Ventilator skilled-nursing facility  
 Assisted living facility  
 Other

Type of Long-Term Care Setting: (Check all that apply)

If Other, please specify:

---

Other Setting:

- Dialysis facility  
 Dental setting  
 One Health Collaborative  
 Telehealth  
 Ambulatory surgical center  
 Veterinary setting  
 Other

Type of Other Setting: (Check all that apply)

If Other, please specify:

---

## Measure 2.1 Outpatient Setting

Select the category that describes the activity:

- Assessment of Antibiotic Stewardship Implementation  
 Antibiotic Use Tracking & Reporting  
 Antibiotic Stewardship Action & Collaboration  
 Antibiotic Stewardship Education & Communication

- Assessment of Antibiotic Stewardship Implementation: Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed

- Antibiotic Use Tracking & Reporting: Monitor antibiotic prescribing. Measuring antibiotic use is critical to identify variability in antibiotic use and to assess, support, and improve stewardship interventions

- Antibiotic Stewardship Action & Collaboration: Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative

- Antibiotic Stewardship Education & Communication: Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice (Check all that apply)

Outpatient: Assessment of Antibiotic Stewardship Implementation (Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed)

Select the element(s) used to identify healthcare professionals or settings.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- High or inappropriate antibiotic prescribing rates overall or for priority conditions
- MDRO outbreak
- Identification on Infection Control Assessment & Response (ICAR) tool
- Limited access to antibiotic stewardship expertise (e.g., rural facilities)

Outpatient: Antibiotic Use Tracking & Reporting (Monitor antibiotic prescribing. Measuring antibiotic use is critical to identify variability in antibiotic use and to assess, support, and improve stewardship interventions)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Commercial/proprietary data (e.g., IQVIA)
- CMS data (e.g., Medicaid data, Medicare public use files)
- All Payer Claims data
- HEDIS measures
- Antibiotic use reporting dashboard

Outpatient: Antibiotic Stewardship Action & Collaboration (Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Electronic health record-based interventions
- Prescriber feedback letters or emails

Outpatient: Antibiotic Stewardship Education & Communication (Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Plan and participate in US Antibiotic Awareness Week promotional activities
- Support a jurisdiction-wide stewardship educational activity (e.g., workshop, conference, or summit)
- Provide facility-specific antibiotic stewardship mentorship and support (virtual or in-person) to outpatient settings with limited access to antibiotic stewardship expertise (e.g., rural facilities)

---

Number of outpatient facilities engaged:

(Enter 0 if no facilities engaged)

---

---

Number of outpatient healthcare professionals engaged:

(Enter 0 if no healthcare professionals engaged)

---

Type of partner(s) engaged:

(Check all that apply)

- Healthcare system
- Payer
- Academic partner
- Other state or local health department (outside of your state)
- Multi-state collaborative
- Local health department (within your state)
- Regulatory/licensing agency
- Local or national professional organization
- HIINS or QIN/QIOs
- Other
- None

---

If Other, please describe:

---

---

### Measure 2.2 Acute Care Setting

Select the category that describes the activity:

- Assessment of Antibiotic Stewardship Implementation: Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed
- Antibiotic Use Tracking & Reporting: Monitor antibiotic prescribing. Measuring antibiotic use is critical to assess, support, and improve stewardship interventions, and identify variability in antibiotic use
- Antibiotic Stewardship Action & Collaboration: Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative
- Antibiotic Stewardship Education & Communication: Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice (Check all that apply)

- Assessment of Antibiotic Stewardship Implementation
- Antibiotic Use Tracking & Reporting
- Antibiotic Stewardship Action & Collaboration
- Antibiotic Stewardship Education & Communication

Acute Care: Assessment of Antibiotic Stewardship Implementation (Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed)

Select the element(s) used to identify healthcare professionals or settings.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Not meeting Core Elements on National Healthcare Safety Network (NHSN) annual hospital survey
- NHSN AU Option outlier
- MDRO outbreak
- Identification on Infection Control Assessment & Response (ICAR) tool
- Limited access to antibiotic stewardship expertise (e.g., rural facilities)

Acute Care: Antibiotic Use Tracking & Reporting (Monitor antibiotic prescribing. Measuring antibiotic use is critical to assess, support, and improve stewardship interventions, and identify variability in antibiotic use)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Support NHSN AU Option enrollment

Acute Care: Antibiotic Stewardship Action & Collaboration (Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Leverage NHSN AU Option Standardized Antimicrobial Administration Ratio (SAAR) metrics to inform where to focus improvement activities
- Create facility certificates (e.g., honor roll) to acknowledge success based on the implementation of advanced stewardship criteria
- Prescriber feedback letters or emails

Acute Care: Antibiotic Stewardship Education & Communication (Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply):

- Plan and participate in US Antibiotic Awareness Week promotional activities
- Support a jurisdiction-wide stewardship educational activity (e.g., workshop, conference, or summit)
- Provide facility-specific antibiotic stewardship mentorship and support (virtual or in-person) to acute care settings with limited access to antibiotic stewardship expertise (e.g., rural facilities)

---

Number of acute care facilities engaged:  
(Enter 0 if no facilities engaged) \_\_\_\_\_

---

Number of acute care healthcare professionals engaged:  
(Enter 0 if no healthcare professionals engaged) \_\_\_\_\_

---

Type of partner(s) engaged:

(Check all that apply)

- Healthcare system
  - Payer
  - Academic partner
  - Other state or local health department (outside of your state)
  - Multi-state collaborative
  - Local health department (within your state)
  - Regulatory/licensing agency
  - Local or national professional organization
  - HIINS or QIN/QIOs
  - Other
  - None
- 

If Other, please describe: \_\_\_\_\_

---

### Measure 2.3 Long-Term Care Setting

---

Select the category that describes the activity:

- Assessment of Antibiotic Stewardship Implementation
- Antibiotic Use Tracking & Reporting
- Antibiotic Stewardship Action & Collaboration
- Antibiotic Stewardship Education & Communication

- Assessment of Antibiotic Stewardship Implementation: Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed

- Antibiotic Use Tracking & Reporting: Monitor antibiotic prescribing. Measuring antibiotic use is critical to assess, support, and improve stewardship interventions, and identify variability in antibiotic use

- Antibiotic Stewardship Action & Collaboration: Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative

- Antibiotic Stewardship Education & Communication: Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice (Check all that apply)

Long-term Care: Assessment of Antibiotic Stewardship Implementation (Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed)

Select the element(s) used to identify healthcare professionals or settings.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Not meeting the Core Elements on NHSN annual facility survey or health department-specific LTC survey
- Stewardship-related citation on regulatory assessment
- High or inappropriate antibiotic prescribing rates or for priority conditions
- MDRO outbreak
- Identification on Infection Control Assessment & Response (ICAR) tool
- Limited access to antibiotic stewardship expertise (e.g., rural facilities)

Long-term Care: Antibiotic Use Tracking & Reporting (Monitor antibiotic prescribing. Measuring antibiotic use is critical to assess, support, and improve stewardship interventions, and identify variability in antibiotic use)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements; you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Support collaboratives and partnerships to use long-term care pharmacy or electronic health record data to track and report facility-level AU

Long-term Care: Antibiotic Stewardship Action & Collaboration (Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Support collaboratives that implement activities to improve AU such as electronic health record-based stewardship interventions
- Create facility certificates (e.g., honor roll) to acknowledge success based on the implementation of activities outlined in the Core Elements checklist
- Prescriber feedback letters or emails

Long-term Care: Antibiotic Stewardship Education & Communication (Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

- Plan and participate in US Antibiotic Awareness Week promotional activities
- Support a jurisdiction-wide stewardship educational activity (e.g., workshop, conference, or summit)
- Provide facility-specific antibiotic stewardship mentorship and support (virtual or in-person) to long-term care settings with limited access to antibiotic stewardship expertise (e.g., rural facilities)

Number of long-term care facilities engaged:  
(Enter 0 if no facilities engaged)

\_\_\_\_\_

Number of long-term care healthcare professionals engaged:  
(Enter 0 if no healthcare professionals engaged)

---

Type of partner(s) engaged:

(Check all that apply)

- Healthcare system
- Payer
- Academic partner
- Other state or local health department (outside of your state)
- Multi-state collaborative
- Local health department (within your state)
- Regulatory/licensing agency
- Local or national professional organization
- HIINS or QIN/QIOs
- Other
- None

If Other, please describe:

---

#### Measure 2.4 Other Setting

Select the category that describes the activity:

- Assessment of Antibiotic Stewardship Implementation: Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed
- Antibiotic Use Tracking & Reporting: Monitor antibiotic prescribing. Measuring antibiotic use is critical to to assess, support, and improve stewardship interventions, and identify variability in antibiotic use
- Antibiotic Stewardship Action & Collaboration: Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative
- Antibiotic Stewardship Education & Communication: Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice (Check all that apply)

- Assessment of Antibiotic Stewardship Implementation
- Antibiotic Use Tracking & Reporting
- Antibiotic Stewardship Action & Collaboration
- Antibiotic Stewardship Education & Communication

Other: Assessment of Antibiotic Stewardship Implementation (Identify healthcare professionals or settings where improving antibiotic use and enhancing Core Elements of Antibiotic Stewardship uptake is needed)

Select the element(s) used to identify healthcare professionals or settings.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

- High or inappropriate antibiotic prescribing rates overall or for priority conditions
- MDRO outbreak
- Identification on Infection Control Assessment & Response (ICAR) tool
- Limited access to antibiotic stewardship expertise (e.g., rural facilities)

(Check all that apply)

Other: Antibiotic Use Tracking & Reporting (Monitor antibiotic prescribing. Measuring antibiotic use is critical to to assess, support, and improve stewardship interventions, and identify variability in antibiotic use)

- Support collaboratives and partnerships to track and report facility-level AU

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

Other: Antibiotic Stewardship Action & Collaboration (Implement evidence-based, local-level stewardship activities with partners or in the setting of a stewardship collaborative)

- Support collaboratives that implement activities to improve AU such as electronic health record-based stewardship interventions
- Create facility certificates (e.g., honor roll) to acknowledge success based on the implementation of stewardship activities
- Prescriber feedback letters or emails

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

Other: Antibiotic Stewardship Education & Communication (Engage with healthcare professionals, patients, and the public to optimize antibiotic use, and inform guidelines and policies to strengthen stewardship practice)

- Plan and participate in US Antibiotic Awareness Week promotional activities
- Support a jurisdiction-wide stewardship educational activity (e.g., workshop, conference, or summit)
- Provide antibiotic stewardship mentorship and support (virtual or in-person) to settings with limited access to antibiotic stewardship expertise (e.g., rural facilities)

Select the element(s) that are part of the activity.

The list is not inclusive of all elements. If your stewardship activity is not included, you may include other elements not listed here in the Summary of Activity section above.

(Check all that apply)

Number of other facilities engaged:

(Enter 0 if no facilities engaged)

\_\_\_\_\_

Number of other healthcare professionals engaged:

(Enter 0 if no healthcare professionals engaged)

\_\_\_\_\_

---

Type of partner(s) engaged:

(Check all that apply)

- Healthcare system
- Payer
- Academic partner
- Other state or local health department (outside of your state)
- Multi-state collaborative
- Local health department (within your state)
- Regulatory/licensing agency
- Local or national professional organization
- HIINS or QIN/QIOs
- Other
- None

---

If Other, please describe:
