Description & Funding

Description

Priority: Standard

Date Needed: 03/30/2022

Determination Start Date: 03/18/22

Description:

Million Hearts# is a national initiative to prevent 1 million heart attacks and strokes by 2027. The purpose of the Million Hearts# Hospital & Health Systems Recognition program is to recognize institutions working to systematically improve the cardiovascular health of the population and communities they serve through a focus on Building Healthy Communities, Optimizing Care, Focusing on Health Equity, and Supplemental Programs and Innovations. Hospitals and health systems will self-nominate through an online portal confirming that they are: a.)Committed to implement strategies that promote cardiovascular health b.)Provide documentation of current strategies that they are implementing in order to promote cardiovascular health c.) Provide documentation of current strategies that they are implementing in order to promote cardiovascular health and provide data that shows positive health outcomes as a result of those strategies being implemented. Nominations will be reviewed using predetermined criteria to ascertain that they meet the eligibility criteria. The determinations by the review group will be reviewed by an expert panel of judges. Recognized designees will participate in the development of a success story product to be shared broadly with the public health and clinical audiences. CDC staff members have developed the application criteria, data collection instruments, and selection criteria. Data will be stored by CDC on a secure CDC file system. This data will be stored on a secure server that will be password protected. CDC's Million Hearts# team and its funded partner (The National Association for Chronic Disease Directors) will have access to this data. Data will not be shared with any other entities, and will be stored for 3 years. The objective of this program is to identify and recognize hospitals and health systems that work to improve cardiovascular health in a narrative or documentary format. No individual patient level data will be collected, only practice level summary data. No generalizable knowledge will emerge from this project. A manuscript is not planned at this time. Selected hospitals and health systems will be recognized through web-based platforms.

IMS/CIO/Epi-Aid/Lab-Aid/Chemical Exposure Submission: No

IMS Activation Name: Not selected

Primary Priority of the Project: Not selected

Secondary Priority(s) of the Project: Not selected

Task Force Associated with the Response: Not selected

CIO Emergency Response Name: Not selected

Epi-Aid Name:	Not selected
Lab-Aid Name:	Not selected
Assessment of Chemical Exposure Name:	Not selected
Goals/Purpose	The purpose of the Million Hearts# Hospital & Health Systems Recognition program is to recognize institutions working to systematically improve the cardiovascular health of the population and communities they serve through a focus on Building Healthy Communities, Optimizing Care, Focusing on Health Equity, and Supplemental Programs and Innovations.
Objective:	The objective of this program is to identify and recognize hospitals and health systems that work to improve cardiovascular health in a narrative or documentary format.
Does this project include interventions, services, or policy change work aimed at improving the health of groups who have been excluded or marginalized and /or decreasing disparities?:	No
Project does not incorporate elements of health equity science:	Not Selected
Measuring Disparities:	Not Selected
Studying Social Determinants of Health (SDOH):	Not Selected
Assessing Impact:	Not Selected
Methods to Improve Health Equity Research and Practice:	Not Selected
Other:	Million Hearts will recognize hospitals and health systems that are using strategies to focus on priority populations such as pregnant and postpartum women, people from racial/ethnic minority groups, people with lower incomes and people who live in access deserts.
Activities or Tasks:	Programmatic Work
Target Populations to be Included/Represented:	Businesses ; Healthcare Provider
Tags/Keywords:	Awards and Prizes
CDC's Role:	Activity originated and designed by CDC staff, or conducted at the specific request of CDC, or CDC staff will approve study design and data collection as a condition of any funding provided
Method Categories:	Individual Interviews (Qualitative)
Methods:	Applicants to the Million Hearts Hospitals & Health Systems Recognition program will voluntarily submit an application attesting to the Million Hearts strategies that they commit to implement, are currently implementing or have been implementing and achieved results. CDC and it's funded partner (National Association of Chronic Disease Directors) will review the application data and conduct a qualitative interview with the highest-achieving applicants.
Collection of Info, Data or Biospecimen:	Applicants will submit an application through a web-based portal. Qualitative interviews with the highest-achieving applicants will be held by phone. Million Hearts will recognize the work and strategies used by select hospitals and health systems and promote their work through

Expected Use of Findings/Results and their impact: web-based platforms in narrative or documentary format.

Could Individuals potentially be identified based on Information Collected? No

Suggested level of risk to subjects

Do you anticipate this project will be exempt research or non-exempt research

Requested consent process wavier

Informed consent for adults No Selection

Children capable of providing assent No Selection

Parental permission No Selection

Alteration of authorization under HIPPA Privacy Rule No Selection

Requested Waivers of Documentation of Informed Consent

Informed consent for adults No Selection

Children capable of providing assent No Selection

Parental permission No Selection

Consent process shown in an understandable language

Reading level has been estimated No Selection

Comprehension tool is provided No Selection

Short form is provided No Selection

Translation planned or performed No Selection

Certified translation / translator No Selection

Translation and back-translation to/from target language(s) No Selection

Other method No Selection

Clinical Trial

Involves human participants No Selection

Assigned to an intervention No Selection

Evaluate the effect of the intervention No Selection

Evaluation of a health related biomedical or behavioral outcome No Selection

Registerable clinical trial No Selection

Other Considerations

Exception is requested to PHS informing those bested about HIV serostatus No Selection

Human genetic testing is planned now or in the future No Selection

Involves long-term storage of identifiable biological specimens No Selection

Involves a drug, biologic, or device No Selection

Conducted under an Investigational New Drug exemption or Investigational Device Exemption No Selection

Data

DMP

Proposed Data Collection Start Date: 12/1/22

Proposed Data Collection End Date: 11/30/25

Proposed Public Access Level: Public

Public Access Justification:

Million Hearts will release promotional narratives to highlight strategies that applicants attest they are using to address heart disease and stroke. This recognition program aims to recognize and disseminate strategies that institutions are using to successfully address heart disease and stroke prevention.

How Access Will Be Provided for Data:

Data will be stored by CDC on a secure CDC file system. This data will be stored on a secure server that will be password protected. CDC's Million Hearts# team and its funded partner (The National Association for Chronic Disease Directors) will have access to this data. Data such as the applicant's contact information will not be shared with any other entities, and will be stored for 3 years.

Plans for Archival and Long Term Preservation:

Data will be stored for 3 years and then archived.
