National Center on Subsidy Innovation and Accountability
Generic Data Collection Bank of Questions

Overview: This document, using constructs and format developed by the Office of Head Start and NORC to facilitate data aggregation and analysis across events of the National T/TA Centers and reviewed by the Office of Child Care (OCC), outlines a bank of data collection questions to assess customer feedback to technical assistance. It identifies five constructs and related survey questions to be used by the National Center on Subsidy Innovation and Accountability (NCSIA) to evaluate the delivery of universal, targeted, tailored, and intensive technical assistance (TA). These constructs are *Content Quality, Content Fit, Increased Knowledge*, and *Intended Application of Knowledge*.

This bank of questions is for poll, discussion, pre and post surveys and other customer feedback surveys for the NCSIA's training and TA offerings. Most universal and short-term TA engagements will include a post-survey only. A pre-post survey will likely be used for intensive, targeted, and long-term individualized engagements. NCSIA will select the most appropriate questions from this bank of questions based on the specific technical assistance event.

All information collection requests will include the follow statement:
