**SUPPLEMENTARY INFORMATION:** In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we

provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on May 16, 2025 (90 FR 21075). The following supportive comment was received:

The Arizona Department of Water Resources (ADWR) supports the Bureau of Reclamation's (Reclamation) renewal of the Lower Colorado River Well Inventory information collection pursuant to the Paperwork Reduction Act of 1995, 44 U.S.C. 3501. ADWR relies on information collected by the Bureau of Reclamation for the proper accounting of diversions and consumptive uses of the Colorado River in the Lower Basin, which ensures compliance with the Supreme Court's decision in *Arizona v. California*, 547 U.S. 150 (2006). Without the information collected under the subject **Federal Register** notice (90 FR 21075), Reclamation's role in administering the waters of the lower Colorado River would be significantly undermined. In particular, without adequate reporting requirements in Arizona for groundwater use outside of designated Active Management Areas, Reclamation's information collection provides vital information that is not available elsewhere.

No changes to the information collection are necessitated by this comment.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of

information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Abstract:** All diversion of mainstream Colorado River water must be in accordance with the Colorado River water entitlement pursuant to the Boulder Canyon Project Act (43 U.S.C. 617; Pub. L. 70–642, 45 Stat. 1057). The Consolidated Decree of the United States Supreme Court in *Arizona v. California*, 547 U.S. 150 (2006) requires the Secretary of the Interior to account for all diversions of mainstream Colorado River water along the lower Colorado River, including water drawn from the mainstream by underground pumping. To meet the water entitlement and accounting obligations, an inventory of wells and river pumps is required along the lower Colorado River that gathers specific information concerning these wells, such as water level, pumping volume, and permit number.

**Title of Collection:** Lower Colorado River Well Inventory.

**OMB Control Number:** 1006–0014.

**Form Number:** Form LC–25.

**Type of Review:** Extension of a currently approved collection.

**Respondents/Affected Public:** Well and river-pump owners and operators along the lower Colorado River in Arizona, California, and Nevada. Each diverter (including well pumpers) must be identified and their diversion locations and water use determined.

**Total Estimated Number of Annual Respondents:** 50.

**Total Estimated Number of Annual Responses:** 50.

**Estimated Completion Time per Response:** An average of 20 minutes is required to interview individual well and river-pump owners or operators.

**Total Estimated Number of Annual Burden Hours:** 17 hours.

**Respondent's Obligation:** Required to obtain or retain a benefit.

**Frequency of Collection:** These data are collected only once for each well or river-pump owner or operator as long as changes in water use, or other changes that would impact contractual or

administrative requirements, are not made. A respondent may request that the data for its well or river pump be updated after the initial inventory.

**Total Estimated Annual Nonhour Burden Cost:** 0.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).
