Please understand the Texas Public Schools have so much on the data reporting for our state that, asking the districts to collect this data is far from easy to complete. I would suggest as a PEIMS Coordinator at a District that given my required state reporting deadlines that you look at putting this back on the college board and state to collect the CRDC data. With the way TEA has upgraded this system I am not sure where the time will be to collect good accurate data on the public schools systems. We all love our jobs but, we can only handle so much with the ongoing changes and the CRDC data collecting. Please consider having the state or the college board submit the data for you and the OCR.
