CRDC- I do appreciate the opportunity to provide the feedback for the proposed next collections. I understand the importance of collecting this information but it also places a large burden on local education agencies.

The data is already accessible through the state agencies so requiring the LEA"s to provide this data again puts a strain on those providing the data.

LEA's are extremely busy with numerous submissions already required by the state agency. Requiring OCR only duplicates the amount of submissions we are already submitting.

I hope OCR explores different ways of collecting this information to alleviate the strain districts are already experiencing.

Thank you for considering our feedback and the ongoing commitment to equality in public school education.

Sincerely,
Rachael Zapata
