As a school administrator having to file the CRDC several times, I find it to be a major time consumer on top of our many other required duties. Our State is working on data modernization and trying to reduce reporting and data collection burdens. Is there anyway that the CRDC can find a better, more efficient way, to collect the data they are looking for? I understand the need for data, however the time all of these reports take is a major burden on a small school district's administration which then takes time away from working on local items that directly impact our students. Thank you.
