Good afternoon. I am writing today to stress what a burden this data submission is. We work tirelessly getting data to TEA who i turn, should be sending this data on to this office. We are understaffed and can not even keep up with our daily state requirements without now this additional stress. Why can't you contract with TEA to get this data. It would be one resource so therefore your data would be more accurate. We are tired of being pushed to complete unnecessary work!

Regards.
