Thank you for the opportunity to comment on the Civil Rights Data Collection. I agree that the collection of this data is important, however I also believe that this data has already been collected and can be accessed in a much better way.

The OCR should be able to establish data-sharing agreements with state education agencies that we already submit data to. (TEA, College Board, etc.)

The time and strain it puts on a district to meet these deadlines along with all of the other submissions we submit is unfair especially when most districts do not have enough staff to begin with.

Thank you!
