Civil Rights data collection collects information that school districts have already reported, the information should be pulled from the certified data in Calpads. It is a huge burden to do this collection as it overlaps with the Calpads fall 2 deadline. The system is slow and returns errors that are not easy to find and correct. We are a small school district and this collection takes way to long to complete. Also, once you are done, you most likely will be contacted again for clarification even though you have already completed this task. This was supposed to be an every other year collection, we did not create COVID so why are we paying for it - reporting wise? This collection should be cancelled forever as it is a waste of time.
