I don't understand with all states being digital now, why the CRDC can't take information from our yearly submissions instead of piling yet another collection on top of the many we already have. In Texas we have 8 submissions and 9 collections that are all through the year and to add CRDC to this is insane. Get into the Ed-Fi Alliance and pull the information from there but quit giving more work to the most underpaid staff. Everything you ask for in this collection could come from the submissions we turn in as well as from results form College Board and other entities. This is ridiculous. It is a complete waste of time, energy, and money.
