

20502(a), this document provides the public notice that by letters dated March 13, 2025, and May 23, 2025, BNSF petitioned FRA seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA–2025–0042.

Specifically, BNSF requests to discontinue the automatic train stop (ATS) system and remove associated roadway elements (inductors) on the Glorieta (Southwest Division, from milepost (MP) 770.1 to 834.6) and Raton (Kansas Division, from MP 557.0 to 770.1) Subdivisions.

In support of its request, BNSF states that, since the implementation of positive train control (PTC), railroad signaling suppliers have discontinued production of essential components to maintain ATS systems. BNSF also notes that Amtrak is a tenant on the track and includes Amtrak's letter of support for the application.¹

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

Communications received by August 11, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

SUPPLEMENTARY INFORMATION:

Section 1320.8(d), title 5, Code of Federal Regulations (CFR) requires the Pipeline and Hazardous Materials Safety Administration (PHMSA) to provide interested members of the public and affected agencies an opportunity to comment on information collection and recordkeeping requests. This notice identifies information collection requests PHMSA will be submitting to OMB for renewal and extension. These information collections are contained in 49 CFR 171.6 of the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180). PHMSA has revised burden estimates, where appropriate, to reflect current reporting levels or adjustments based on changes in proposed or final rules published since the information collections were last approved. The following information is provided for each information collection: (1) title of the information collection, including former title if a change is being made; (2) OMB control number; (3) summary of the information collection activity; (4) description of affected public; (5) estimate of total annual reporting and recordkeeping burden; and (6) frequency of collection. PHMSA will request a 3-year term of approval for each information collection activity and will publish a notice in the **Federal Register** upon OMB's approval. PHMSA requests comments on the following information collections:

Title: Subsidiary Hazard Class and Number/Type of Packagings.

OMB Control Number: 2137–0613.

Summary: This OMB Control Number contains an information collection related to the placement of the subsidiary hazard class and type of packaging on a shipping paper. The HMR require that shipping papers and emergency response information accompany each shipment of hazardous materials in commerce. Shipping papers serve as a principal means of identifying hazardous materials during transportation emergencies. Firefighters, police, and other emergency response personnel are trained to obtain the DOT

shipping papers and emergency response information when responding to hazardous materials transportation emergencies. The availability of accurate information concerning hazardous materials being transported significantly improves response efforts in these types of emergencies.

In addition to the basic shipping description information on shipping papers, we also require the subsidiary hazard class or subsidiary division number(s) to be entered in parentheses following the primary hazard class or division number on shipping papers. This requirement originally applied only to transportation by vessel. However, the lack of such a requirement posed problems for motor carriers regarding compliance with segregation, separation, and placarding requirements, as well as posing a safety hazard. For example, in the event the motor vehicle becomes involved in an

accident, when the hazardous materials being transported include a subsidiary hazard such as “dangerous when wet” or a subsidiary hazard requiring more stringent requirements than the primary hazard, there is no indication of the subsidiary hazards on the shipping papers and no indication of the subsidiary risks on placards. Under circumstances such as motor vehicles being loaded at a dock, labels are not sufficient to alert hazardous materials employees loading the vehicles, nor are they sufficient to alert emergency responders of the subsidiary risks contained on the vehicles. Therefore, we require the subsidiary hazard class or subsidiary division number(s) to be entered on the shipping paper for purposes of enhancing safety and international harmonization. The following information collection and burden is associated with this OMB Control Number:

Information collection	Respondents	Total annual responses	Seconds per response	Total annual burden hours
Subsidiary Hazard Class on Shipping Papers	260,000	43,810,000	2	24,339

Affected Public: Shippers and carriers of hazardous materials in commerce.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 260,000.

Total Annual Responses: 43,810,000.

Total Annual Burden Hours: 24,339.

Frequency of Collection: On occasion.

Rail carriers, shippers, PHMSA’s Office of Hazardous Materials Safety (OHMS), the Federal Railroad Administration (FRA), and the Association of American Railroads (AAR) may use this
