Thank you for the opportunity to provide recommendations on this important topic to national security. The FAR absolutely needs these important clauses to ensure FASA and commercial preference are enforceable law in the Court of Federal Claims and Federal Courts. The cost to the nation from profit driven government development is almost incalculable. This is the most circumvented and unenforceable procurement statute in its current form. Please feel free to reach out if we can be of further assistance. sincerely, Balan Ayyar, CEO, percipient.ai
