

Appendix K2: Food-at-Home (FAH) Use Case for R2

Food-at-Home (FAH) Use Case

Critical tasks tested:

- Start a day
- Select a food event
- Enter food item name:
 - Text
 - PLU
- Enter weight/volume/size
- Enter number of items (quantity)
- Enter payment information
 - Pay by multiple modes

Setting:

- Grocery shopping at a supermarket

Scenario:

TODAY you stopped at a supermarket during your lunch break to buy groceries for the next few days. You also grabbed a sandwich at the deli counter and ate it during lunch break. You paid for your groceries and sandwich together with your EBT card and debit card. You kept the receipt and the price for the sandwich is on the receipt as well. Please enter the information about this purchase in the Food Log.

Groceries: (NOTE: Actual items may be different from this list depending on availability.

However, packaging features will be preserved)

- Pre-packaged food
 - 1 snack box
 - 1 bottle of fruit jam
- Produce (with PLU)
 - 1 avocado
 - 1 squash
 - 1 yam
- Food from deli (FAFH item)
 - Fresh-made sandwich
- Bulk food
 - 1 bag of coffee beans
- Liquid
 - 1 bottle of milk
- Multiple-item package
 - 4-pack ginger beer

Non-food items:

- 1 soap
- 1 plastic shopping bag
