

Non-Substantive Change Request
US Census Bureau Generic Pretesting Clearance
OMB Control No. 0607-0725
July 1, 2025

Summary of request

The US Census Bureau requests approval for a non-substantive change to the currently approved screening questionnaire for its generic pretesting clearance (0607-0725). This change is to comply with the recent executive order following the guidance provided by OMB in the memorandum “Guidance on Implementing Section 3(e) of the Executive Order 14168 in Accordance with the Paperwork Reduction Act and the Privacy Act” on February 11, 2025, and to update the race/ethnicity items for compliance with the SPD-15 revision.

Description of changes requested

This update involves revision to existing questions. Below, we show the currently approved question wording and the new question wording that will replace the current wording. Both English and Spanish will be updated. For sex, the question stem will vary depending on whether the question is being read by the respondent on the web or by a researcher on the phone. This is to optimize respondents’ comprehension of the question and minimize its cognitive burden. For race/ethnicity, we will use the minimum categories with examples for web and the minimum categories for the telephone. Since we are not creating estimates from the race question, a less detailed version is sufficient for the purposes of this study (the collection of demographic information for potential cognitive interview participants, from a convenience sample) while limiting respondent burden.

Burden

We are not requesting any change in burden hours.
