

Based on the analysis contained herein of Echo's proposed survey activity described in its LOA application and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the affected species or stock sizes (*i.e.*, less than one-third of the best available abundance estimate) and therefore the taking is of no more than small numbers.

#### Authorization

NMFS has determined that the level of taking for this LOA request is consistent with the findings made for the total taking allowable under the incidental take regulations and that the amount of take authorized under the LOA is of no more than small numbers. Accordingly, we have issued an LOA to Echo authorizing the take of marine mammals incidental to its geophysical survey activity, as described above.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for a revision and extension of a current information collection.

The success of fisheries management programs depends significantly on the availability of fishery data. As part of this fishery data, the National Marine Fisheries Service (NMFS) requires groundfish fishermen in the trawl and non-trawl fisheries to complete a logbook (see 50 CFR 660.13). The logbook used is a standard format developed by the Pacific Fishery Management Council to collect information necessary to effectively manage the fishery on a coast-wide basis. The logbook collects haul or set-level effort data including time, location, gear type, target strategy, and estimated pounds of fish caught per set. Each logbook entry represents a single fishing trip.

NMFS contracts with the Pacific States Marine Fisheries Commission (PSMFC) to distribute and collect the logbook data. These data are used regularly by NMFS, the Council, the West Coast Groundfish Observer Program, NMFS Office of Law Enforcement, and the Coast Guard for fisheries management and enforcement.

Previously, the trawl logbook and non-trawl logbook information collections were separate, this revision would merge the non-trawl logbook information collection from 0648–0804 into the trawl logbook information collection. OMB Control Number 0648–0804 be discontinued upon approval of the revision to 0648–0782.

## II. Method of Collection

The non-trawl logbook is a fully electronic collection utilizing an application operated by PSMFC. The trawl logbook has both paper and electronic options, both administered by PSMFC.
