

What is DUOS and how does it work?

DUOS is a multi-sided data sharing platform bringing together researchers submitting and requesting data, and data access committees and institutional officials overseeing the use of the data.

DUOS for DACs

DACs can swiftly manage data access requests and clearly track data use compliance.

Institutional Oversight

DUOS reduces repetitive work for Signing Officials and expedites data sharing through our

innovative Library Card-style agreements.

Looking for data?

DUOS helps researchers request and access data from multiple sources with a single application.
