MPEP *Mycobacterium tuberculosis* Results Worksheet

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30333; ATTN: PRA (0920-0600).

MPEP *Mycobacterium tuberculosis* Results Worksheet

Enter your drug susceptibility test results for each isolate by using the data worksheets below. There are two worksheets—one for growth-based drug susceptibility results and one for molecular test results. These worksheets are provided as a tool for recording results prior to online data entry.

Growth-based Drug Susceptibility Worksheet: Isolate _____ Method _____

Drug	Susceptible	Resistant	Intermediate	Contaminated / No Growth	No Interpretation	Not Done
Rifampin	☐	☐	☐	☐	☐	☐
Isoniazid—low	☐	☐	☐	☐	☐	☐
Isoniazid—high	☐	☐	☐	☐	☐	☐
