

taking of marine mammals incidental to geophysical survey activity conducted in the GOA over the course of five years following the date of issuance. EnerGeo submitted revised versions of the application on July 14, August 8, and August 12, 2025, and NMFS determined the last of these to be adequate and complete. As with the existing ITRs for geophysical survey activity in the GOA, which will expire in April 2026, the requested ITRs would establish a framework for authorization of incidental take, by harassment only, through LOAs. Under the requested ITRs, if issued, individual applicants planning specific geophysical survey activities would be able to request and receive LOAs.

Readers are advised that on September 3, 2025 (90 FR 42569), NMFS published a Notice of Receipt of a request from the NMFS' Office of Policy for reimplementation of the current ITRs governing the incidental taking of marine mammals during geophysical survey activity conducted in the GOA. The request notes that the pending April 2026 expiration of the current ITR would affect regulatory certainty with loss of an efficient permitting framework, and that reimplementation of the existing ITRs on the basis of the same specified activity defined in the 2021 final rule and associated estimates of incidental take evaluated for the 2024 corrective rulemaking is consistent with the MMPA and appropriate pursuant to Executive Orders 14156, "Declaring a National Energy Emergency," and 14154, "Unleashing American Energy." If issued, the requested regulations would continue the established current framework from the previous rulemaking for authorization of incidental take through LOAs unless and until superseded by a rulemaking and issuance of the ITRs requested by EnerGeo.

Specified Activities

EnerGeo's application describes geophysical survey activity, conducted by industry operators in the western and central GOA. The geographic scope of the request excludes the eastern GOA area placed under a Congressional leasing moratorium through 2022 under the Gulf of Mexico Energy Security Act (GOMESA) (Pub. L. 109-432, 104). On September 8, 2020, President Trump effectively extended this moratorium through withdrawal under the Outer Continental Shelf Lands Act (OCSLA) of the same area covered by the GOMESA moratorium from disposition by leasing for 10 years, beginning on July 1, 2022, and ending on June 30, 2032. Geophysical activities are essential to

oil and gas exploration, development, and production, and are used to characterize the shallow and deep structure of the shelf, slope, and deepwater environments. Geophysical surveys are conducted to obtain information on hydrocarbon production; identify and delineate new areas for hydrocarbon and mineral exploration; aid in siting offshore structures (facilities and pipelines); locate seafloor geologic hazards, archeological resources, and benthic habitats of interest. Geophysical surveys may occur before (pre) or after (post) leasing. Data collected through geophysical surveys may also inform leasing sale prices and business decisions by lessees.

Information Solicited

Interested persons may submit information, suggestions, and comments concerning EnerGeo's request (see **ADDRESSES**). NMFS will consider all information, suggestions, and comments related to the request during the development of proposed regulations governing the incidental taking of marine mammals, if appropriate.

Dated: September 19, 2025.

Kimberly Damon-Randall,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510-22-P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC-2012-0055]

Agency Information Collection Activities; Extension of Collection; Standards for the Flammability of Children's Sleepwear

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of information collection; request for comment.

SUMMARY: As required by the Paperwork Reduction Act of 1995 (PRA), the Consumer Product Safety Commission (CPSC or Commission) announces that the Commission has submitted to the Office of Management and Budget (OMB) a request for extension of approval of information collection requirements associated with the Standard for the Flammability of Children's Sleepwear: Sizes 0 Through 6X and the Standard for the Flammability of Children's Sleepwear: Sizes 7 Through 14. OMB previously approved the collection of information under control number 3041-0027. OMB's most recent extension of

approval will expire on September 30, 2025. On July 11, 2025, CPSC published a notice in the **Federal Register** to announce the agency's intention to seek extension of approval of the collection of information. The Commission received one public comment in support of the Commission's safety standard for children's sleepwear. Therefore, by publication of this notice, the Commission announces that CPSC has submitted to the OMB a request for extension of approval of that collection of information.

DATES: Submit comments on the collection of information by October 24, 2025.

ADDRESSES: Submit comments about this request by email: OIRA_submission@omb.eop.gov or fax: 202-395-6881. Comments by mail should be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the CPSC, Office of Management and Budget, Room 10235, 725 17th Street NW, Washington, DC 20503. Written comments that are sent to OMB also should be submitted electronically at <http://www.regulations.gov>, under Docket No. CPSC-2012-0055.

FOR FURTHER INFORMATION CONTACT: Cynthia Gillham, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; (301) 504-7791, or by email to: pra@cpsc.gov.

SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Standard for the Flammability of Children's Sleepwear: Sizes 0 Through 6X; and the Standard for the Flammability of Children's Sleepwear: Sizes 7 Through 14.

OMB Number: 3041-0027.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of children's sleepwear.

General Description of Collection: The Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (16 CFR part 1615) and the Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14 (16 CFR part 1616) address the fire hazard associated with small-flame ignition sources for children's sleepwear manufactured for sale in, or imported into, the United States. The standards also require manufacturers and importers of children's sleepwear to collect information resulting from product testing and maintenance of the testing records. 16 CFR part 1615, subpart B; 16 CFR part 1616; subpart B.

Estimated Number of Respondents: Based on a review of past inspections and published industry information, CPSC staff estimates that there could be as many as 615 domestic children's apparel manufacturers in the United States subject to the rule. However, not all these manufacturers will produce children's sleepwear. Therefore, this figure is likely an overestimate of the actual number of firms responding to the collection of information in any given year.

Furthermore, using the Harmonized Tariff System (HTS) codes for children's sleepwear, CPSC staff found approximately 3,641 importers that supply children's sleepwear to the U.S. market. Many of the 615 domestic manufacturers, along with many large U.S. retailers, may be among the importers, so this too could be an overestimate of respondents to the information collection. If all 615 U.S. producers and all 3,641 importers introduced new children's sleepwear garments each year, the total number of respondents to the information collection would be 4,256 (615 + 3,641). As noted above, the actual number of respondents is likely lower.

Estimated Time per Response: PRA burden associated with testing and recordkeeping of each sleepwear item is approximately three hours.

Total Estimated Annual Burden: The 50 largest domestic manufacturers and the 100 largest importers may each introduce an average of 100 new children's sleepwear items annually. The annual burden for the 50 large domestic manufacturers and the 100 largest importers is estimated at 45,000 hours for PRA burden associated with testing and recordkeeping (150 firms \times 100 items \times 3 hours). Without adjusting for possible double-counting, CPSC staff estimates that the remaining 565 manufacturers and 3,541 importers may each introduce an average of 10 new children's sleepwear items, for a total burden of 123,180 hours (4,106 \times 10 items \times 3 hours.) Therefore, the total estimated potential annual burden imposed by the standard and regulations on all manufacturers and importers of children's sleepwear will be about 168,180 hours (45,000 + 123,180).

Total Estimated Annual Cost to Respondents: Using compensation data available from the U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," December 2024, Table 4, total compensation for management, professional, and related workers in goods-producing private industries, <http://www.bls.gov/ncs>, the annual cost to the industry is estimated

to be \$12,748,044 based on an hourly wage of \$75.80 \times 168,180 hours.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0360, OMB 3060-0674, 3060-0703; FR ID 314309]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might "further reduce the information collection burden for small business concerns with fewer than 25 employees." The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before October 24, 2025.

ADDRESSES: Comments should be sent to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Your comment must be submitted into www.reginfo.gov per the above instructions for it to be considered. In addition to submitting in www.reginfo.gov also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to PRA@fcc.gov and to

Nicole.Ongele@fcc.gov. Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418-2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page <http://www.reginfo.gov/public/do/PRAMain>, (2) look for the section of the web page called "Currently Under Review," (3) click on the downward-pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees.

OMB Control No.: 3060-0360.

Title: Section 80.409, Station Logs (Maritime Services).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, and state, local and tribal government.

Number of Respondents: 19,770 respondents; 19,770 responses.
