

mChoice CleverCap Onboarding Guide

Below is the app welcome screen. You will hit “Sign in” at baseline. Your account will be set up before enrollment into the study and login credentials will be sent to the email that you provide. A study team member will help you log into and become familiar with the app.

It is important to note that once you log into the app, there is no automatic time out. You must manually log out of the app through use of the side menu bar every time you want to be logged out of the app to maintain confidentiality.

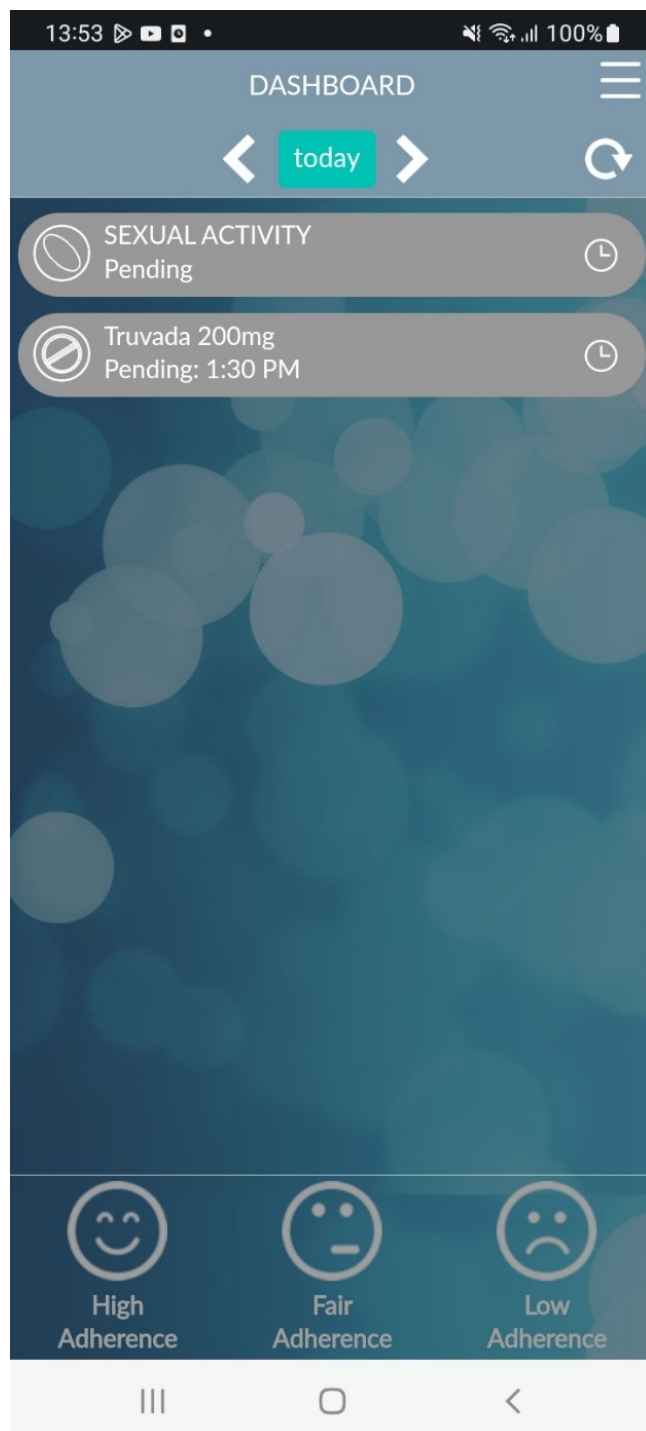

Below is the side menu bar. By tapping the three lines, you can navigate to “Dashboard,” “My Alerts,” “My Stats,” “My Account,” “Support,” “Options,” “Chat,” and “Videos and Information” (all explained further below) or you can log out.

Dashboard

The Dashboard page is the homepage of the CleverCap application. Here, you can enter your sexual activity and manually log that you took your medication. The dashboard displays pending, taken, missed, or off-schedule doses.

Sexual Activity

By clicking 'Add event' on the sexual activity log, you can enter recent sexual activity information. The questions, pictured below, will appear.

For participants who are taking **on-demand PrEP**, logging a sexual activity will trigger an additional pop-up question that states "Did you take your first 2 pill dose?" If 'yes,' reminders for the 2 subsequent 2-1-1 doses (24 and 48 hours after sexual activity) will be enabled. If 'no,' you will receive a private message within the app about post-exposure prophylaxis (PEP). Screenshots are included below.

The image displays three sequential screenshots of a mobile application interface for logging sexual activity.

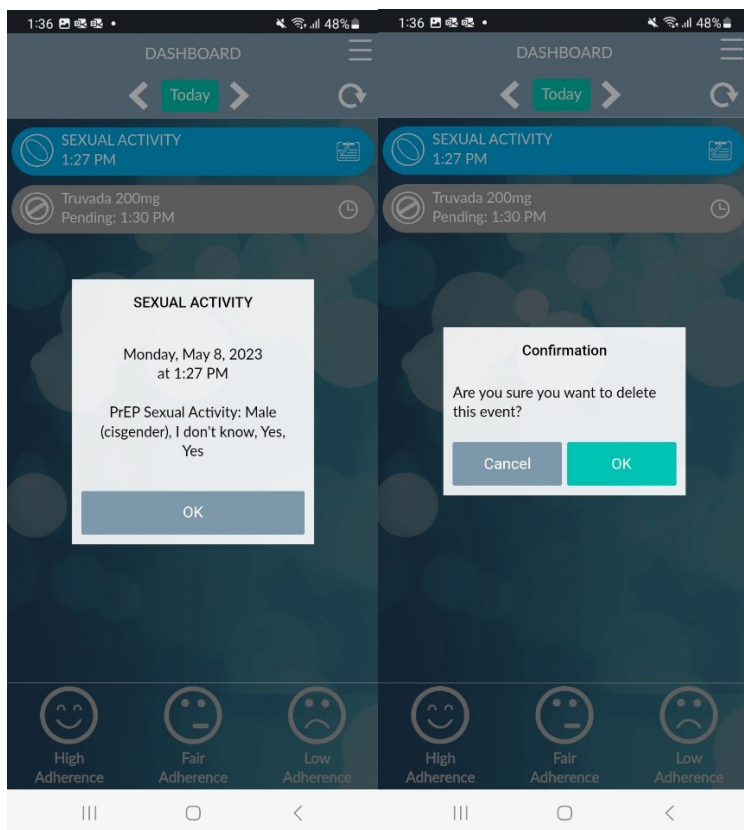

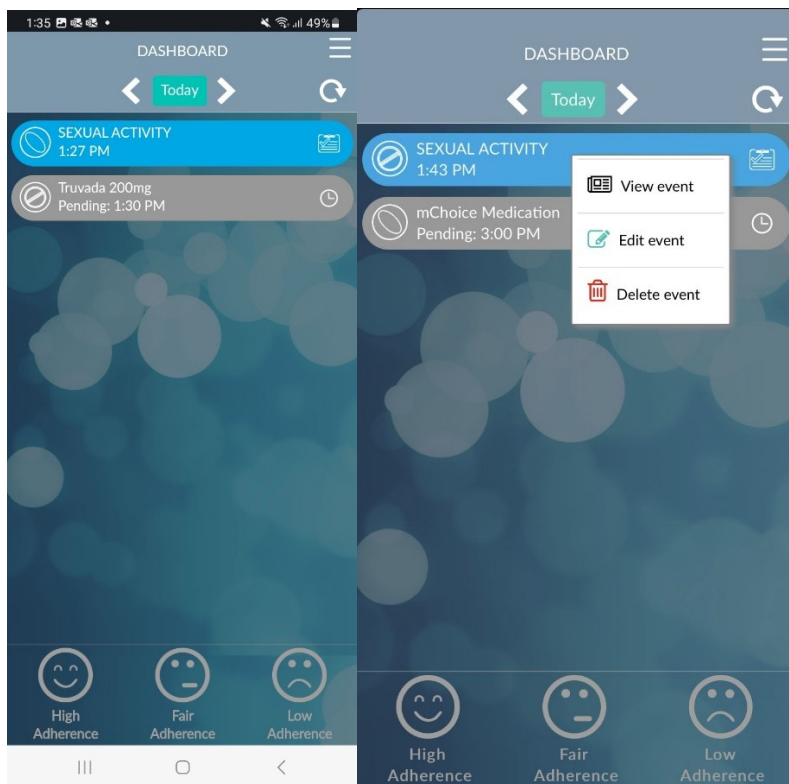

Left Screenshot (Dashboard): Shows the 'DASHBOARD' with a 'Today' button and a 'SEXUAL ACTIVITY' section. The 'SEXUAL ACTIVITY' section has a 'Pending' status and an 'Add event' button. Below it, a 'Truvada 200mg' section shows a 'Pending: 1:30 PM' status. At the bottom, there are three adherence icons: 'High Adherence' (smiley face), 'Fair Adherence' (neutral face), and 'Low Adherence' (frowny face).

Middle Screenshot (PrEP Sexual Activity): Shows the 'PrEP Sexual Activity' form for 'Monday, Jan 23, 2023'. The form includes the following sections:

- Partner gender:** Radio buttons for Male (cisgender), Male (transgender), Female (cisgender), Female (transgender), Other, N/A, and Rather not say.
- Partner HIV status:** Radio buttons for Positive, Negative, and I don't know.
- Is your partner taking PrEP?:** Radio buttons for Yes, No, and I don't know.
- Did you use a condom?:** Radio buttons for Yes and No.

Right Screenshot (PrEP Sexual Activity): Shows the same 'PrEP Sexual Activity' form, but with the 'Did you use a condom?' section expanded, showing the 'Yes' and 'No' options.

Once an event is added, you will have the option to either view, edit, or delete the event.

For On-demand/2-1-1: After logging a sexual activity

 Survey - PrEP Dose Confirmation

Did you take your first 2 pill dose?

☐ Yes

☐ No

Save

PEP Pop-up Message (For participants taking on-demand PrEP)

If you did not take 2 pills prior to engaging in/documenting a sexual activity, you will see the below message.

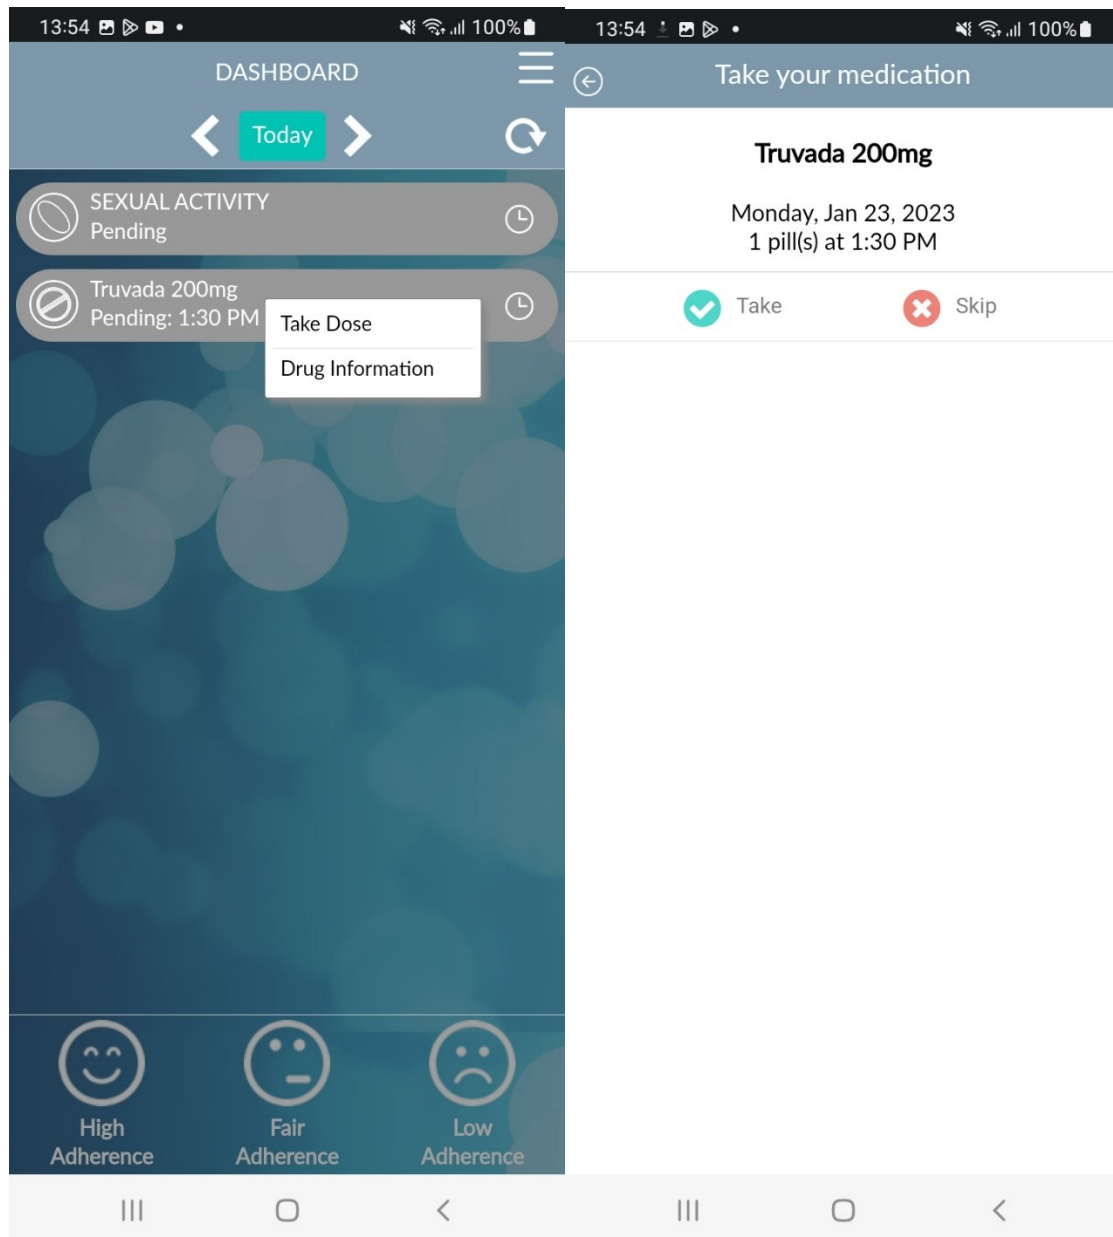

Chat

Post-exposure prophylaxis (PEP) is a medicine to prevent HIV after possible exposure. If you think you could have been exposed to HIV, contact your healthcare provider. PEP should be started within 72 hours of being exposed to HIV.

Dose

By clicking on the medication/dose, you can enter that you have taken your medication.

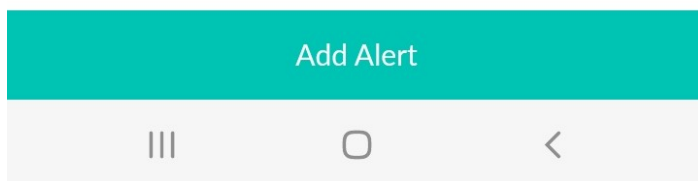

My Alerts

The “My Alerts” page allows you to add alert settings, by clicking ‘Add Alert.’

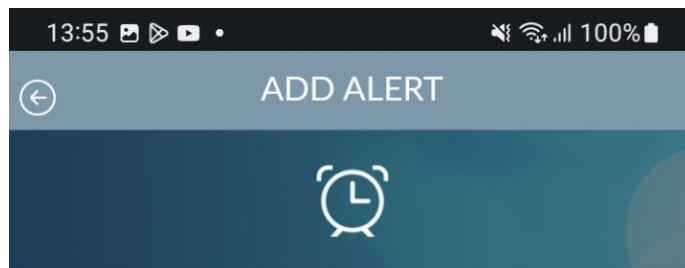

There are no Alarms associated with your account

Get notifications about your medication usage.

Add Alert

On the “Add Alert” page, you can customize your alerts and choose to notify a study team member about late or missed medication dosing, i.e. if you took your medication off-schedule or missed a dose.

Alert me when I

☐ Miss my dose of

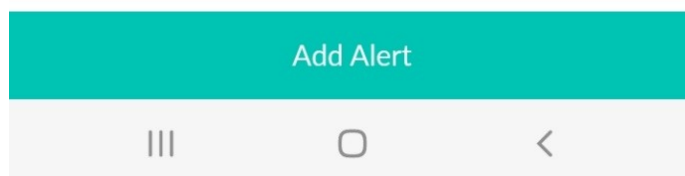

☐ Take an Off-Schedule dose of

Alert My Support team when I

☐ Miss my dose of

☐ Take an Off-Schedule dose of

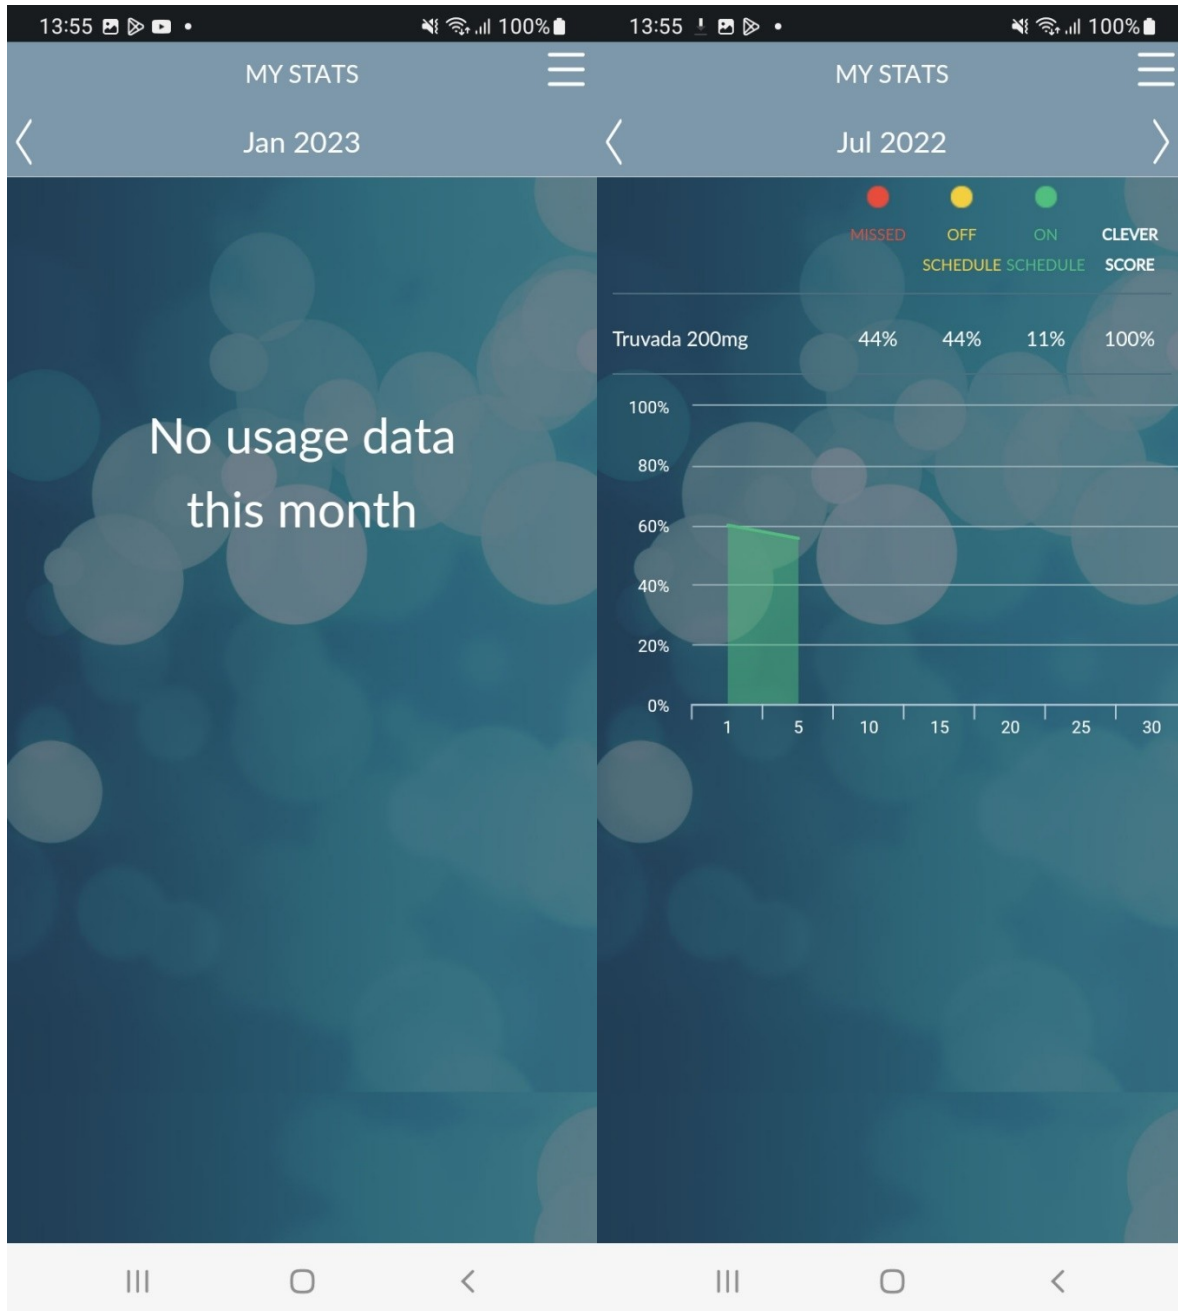

Add support team member

My Stats

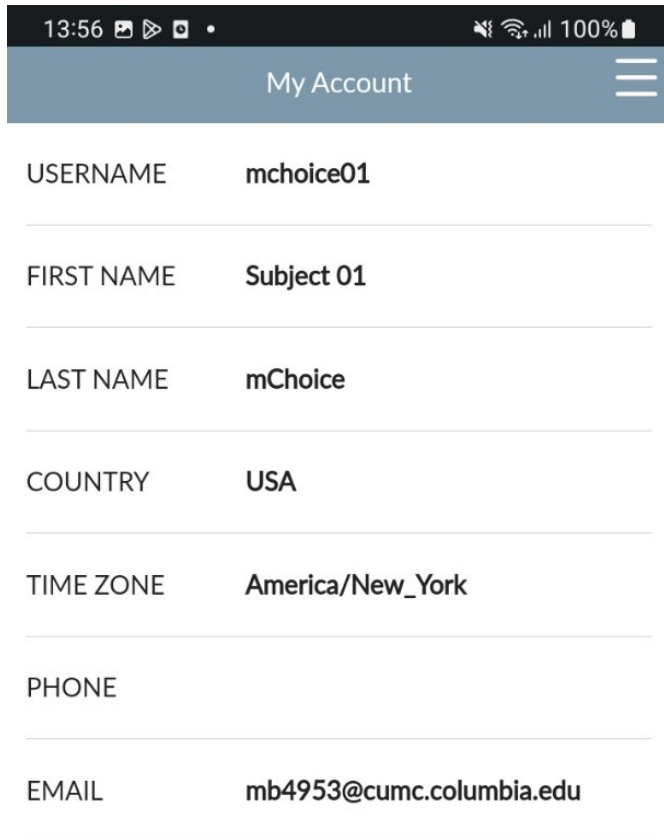

The “My Stats” page shows monthly usage data.

This page can be used by participants on **daily oral PrEP** who would like to see monthly adherence information.

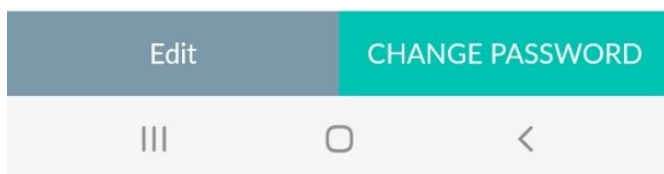

My Account

The “My Account” page shows details of the account such as username, name, and email. On this page, you can click ‘Edit’ to edit your account information or you can click ‘Change Password’ to change your password.

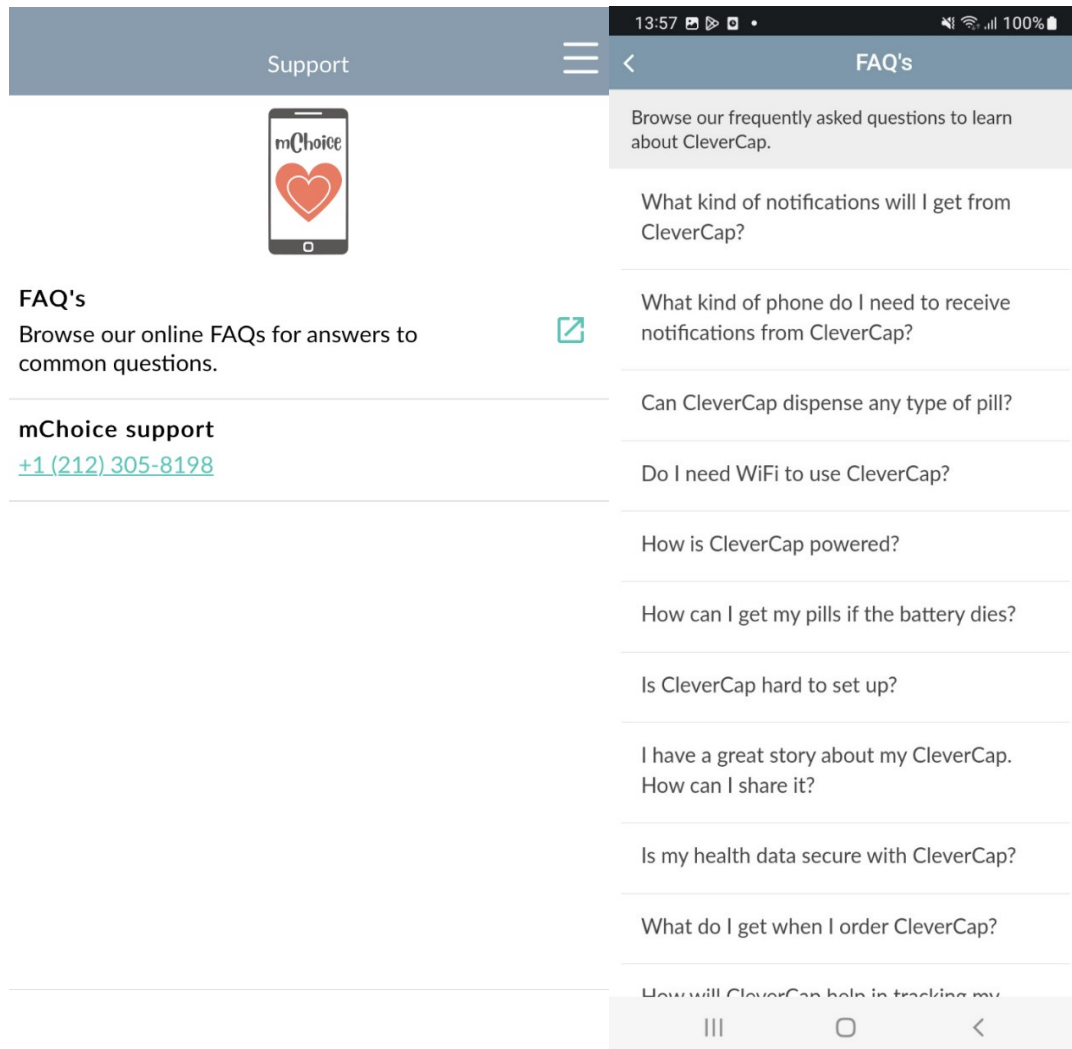

USERNAME	mchoice01
FIRST NAME	Subject 01

Support

The “Support Page” contains a link to CleverCap Frequently Asked Questions (FAQs), and the mChoice support phone number.

Options

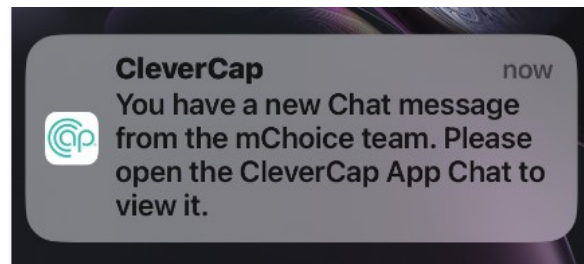

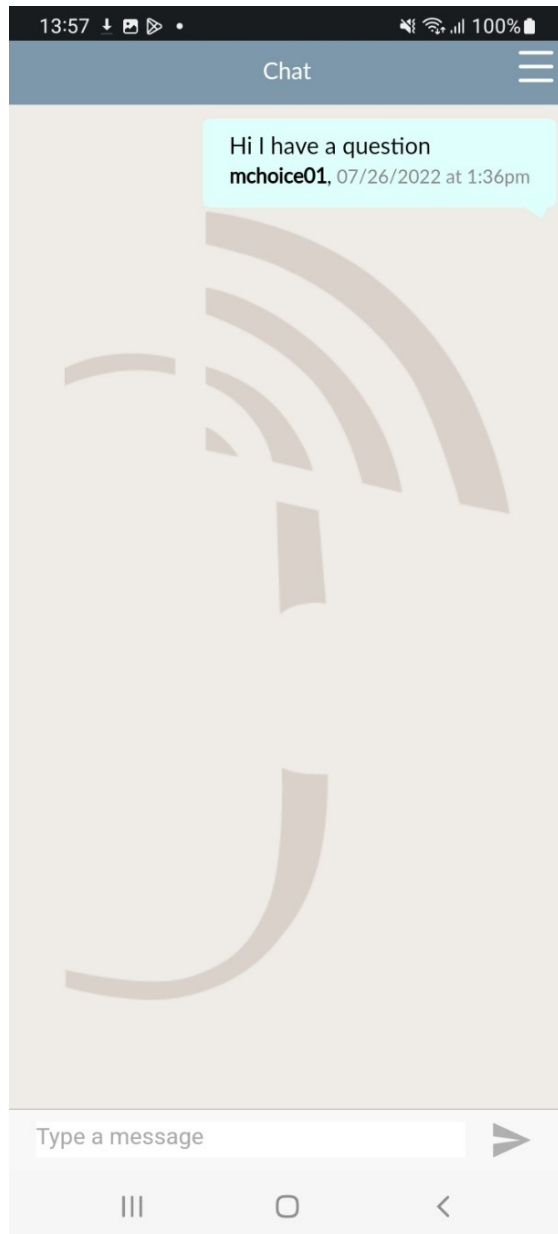

The “Options” page allows you to enable reminders for taking your medication or select English or Spanish as the language for the app.

Chat

The “Chat” page allows you to communicate with the study team about questions or concerns. You will be alerted to any new messages from the study team with a confidential notification (see below). Please note that once you click on the notification, it will direct you to the app’s chat. To avoid someone else viewing the message on your phone, make sure you log out of the app and lock your phone.

For participants on **injectable PrEP**, you will receive injection reminders from the study staff in the chat.

Videos and Information

The “Videos and Information” page contains links to CDC videos and information related to HIV, pre-exposure prophylaxis (PrEP), and post-exposure prophylaxis (PEP).
