Effective Health Care

Opportunity to Comment on Draft Report

We encourage the public to participate in the development of our research projects. Comments can be submitted for:

[Environmental, Clinical and Economic Outcomes of Hospital Resources to Prevent Hospital-Acquired Infections](#)
(Available for comment until March 19, 2025)

This review assesses the evidence comparing reusable and single-use reprocessed medical devices with single-use disposable devices. The primary focus will be on: 1) devices whose inherent purpose is HAI prevention and 2) devices commonly used in bedside care. A secondary focus addresses surgical devices and other scopes.

Opportunity to Submit Scientific Information

The Effective Health Care (EHC) Program is interested in receiving supplemental evidence and data (SEADs) for systematic reviews that are relevant to the questions in our evidence reports. To ensure that it has full access to relevant research, whether or not it is published, the EHC Program is interested in receiving SEADs containing detailed study-specific information. Opportunities to submit scientific information are available for:

[Improving the Management of Menopausal Symptoms in Perimenopausal and Early Postmenopausal Women: A Systematic Review](#)
(Available for submission until March 19, 2025)

The purpose of this systematic review is to synthesize existing research on treatments for menopausal symptoms among perimenopausal and early postmenopausal women and identify research gaps and opportunities.

(Section 944 (c) of the Public Health Service Act [42 U.S.C. 299c 3(c)] requires that information collected for research conducted or supported by AHRQ that identifies individuals or establishments be used only for the purpose for which it was supplied unless they consent to the use of the information for another purpose.)

About us: AHRQ's Effective Health Care Program is committed to providing the best available evidence on the outcomes, benefits and harms, and appropriateness of drugs, devices, and health care services and by helping health care professionals, patients, policymakers, and health care systems make informed health care decisions. The program partners with research centers, academic institutions, health professional societies, consumer organizations, and other stakeholders to conduct research, evidence synthesis, evidence translation, dissemination, and implementation of research findings.
