

## **JUSTIFICATION FOR NO MATERIAL/NONSUBSTANTIVE CHANGE**

### **Pollinator Conservation Social Network Analysis Survey OMB Control Number 1018-0207**

The Service proposes nonsubstantive changes to the currently approved survey, "Center for Pollinator Conservation – Social Network Analysis." The proposed nonsubstantive changes are identified via tracked changes in the updated survey instrument attached to this ICR. The proposed changes are intended to clarify the intent of the questions to minimize confusion and to better facilitate the skip/display logic to be used with the survey administered via Qualtrics. The program added comments to each change to provide additional context for their proposed revisions. Additionally, we updated the point of contact for the survey to replace the previous contact who is no longer with the Service.
