Abstract: The Organic Act of 1916 (NPS Organic Act) (54 U.S.C. 100101) authorizes the Secretary of the Interior to develop regulations for units of the national park system (System units) under the Department's jurisdiction. The Mining in the Parks Act (54 U.S.C. 100731 *et seq.*) directs the Secretary of the Interior to regulate all operations in System units in connection with the exercise of mineral rights on patented and unpatented mining claims.

The regulations codified in 36 CFR part 9, subparts A and B, ensure that mining and non-Federal oil and gas activities in System units are conducted in a manner consistent with conserving resources in System units for the benefit of present and future generations. The information required by subpart A identifies the claim, claimant, and operator (the claimant and operator are often the same) and details how the operator intends to access and develop the locatable minerals associated with the claim. It also identifies the steps the operator intends to take to minimize any adverse impacts of the mining operations on park resources and values and public safety. No information is submitted unless the claimant wishes to conduct mining operations.

The information required by subpart B identifies the owner and operator (the owner and operator are often the same) and details how the operator intends to access and develop the oil and gas rights. It also identifies the steps the operator intends to take to minimize any adverse impacts on park resources and values. No information is submitted unless the owner wishes to conduct oil and gas operations.

The information collected under 36 CFR part 9, subparts A and B, is used to evaluate proposed operations, ensure that all necessary mitigation measures are employed to protect park resources and values, and ensure compliance with all applicable laws and regulations.
