Manufacturer Production Report for Heavy-Duty and Medium-Duty Engines and Vehicles

Last Revision: December 2014 V

Production Report - INSTRUCTIONS

This template allows engine and vehicle manufacturers to submit their annual production data in a simple, consistent format. The reporting of production numbers is required. The number of engines produced by engine family and configuration is required. Your report **must** include production information on each certified engine family, even if the production was zero. Do not enter production data for engines that are exempted from the reporting requirements into the "Exemptions" worksheet. This template should **not** be used to report production data for Part 1037 engines.

Submission Template

Production data for all non-exempt engines or vehicles should be entered in the Submission Template worksheet. Reporting of production numbers is required only for Part 1033. The fields for Max Power, Displacement and Fuel System Type only apply to Part 1033 engines. For Parts 1033 and 1039. Note that the reporting of engine serial number data for Part 86/1036 engines is not required.

Exemptions

If exempted locomotives are identified in the "# Exempted Engines" field in the Submission Template worksheet, they will be listed in the Exemptions worksheet. Basic information as entered in the Submission Template worksheet will appear at the top of the Exemptions worksheet (Locomotive). In addition to identifying information for each exempt engine/locomotive, the associated buyer information must be provided.
