IT Record Description: DFWED OES provides reporting partners (state health departments, environmental health departments, reporting site administrators at the state and local level, etc.) in all 50 states, the District of Columbia, and Puerto Rico, and territories, the ability to enter data about enteric disease outbreaks caused by food, water, animal contact, person-to-person contact, and the environment. DFWED OES contains three modules: NORS, OHHABS, and NEARS. *** OLD INFORMATION The system provides State health departments in all 50 states, the District of Columbia, and Puerto Rico, and territories, the ability to enter data about enteric disease outbreaks caused by food, water, animal contact, person-to-person contact, and the environment. This system was modeled off of the electronic foodborne outbreak reporting system (eFORS, system ID 1263). Total number of data fields collected is around 230.
