I am an experienced RN IBCLC working in a community hospital in Massachusetts.

mPINC has been a key part of improving our patient care and achieving improved health for the community through supporting more successful breastfeeding experiences with longer durations.

We use mPINC to plan our quality improvement projects.

mPINC also helps us to see how we are doing in comparison to the state and the nation as a whole and allows for us to continue to monitor and address our failures and successes which is essential to reducing disparities in our diverse patient population.
