I. HOME PAGE for Data Entry Users

(Home pages are modified based on the user's role(s) so they may or may not see all of the cards shown below. Please note that this is a test account with fake data.)

The screenshot displays the ACRES Home Page with a green header bar. The header includes the ACRES logo, a navigation menu with links to 'Quick Start', 'Work Packages', 'Reports', 'Technical Assistance', and 'My Account', and a search bar with a dropdown for 'Property' and a search field. The main content area is divided into several cards:

- WHERE DO I START?**
 - [Add a new property](#)
 - [Add a CA to my list](#)
 - [Edit an existing property](#)
 - [Add annual PALs data](#)
- WORK PACKAGES**
 - 19 Open Work Packages**
 - Actions for Me**
 - 4 work packages in progress
 - Actions for PO**
 - 15 work packages submitted
 - 14 work package in review
- TECHNICAL ASSISTANCE (TA) - CONTRACT FUNDING**
 - 32 Open TA Work Packages**
 - Additional Actions**
 - [Manage TA Projects](#)
- TECHNICAL ASSISTANCE TO BROWNFIELDS (TAB) - GRANT FUNDING**
 - 1 Open TAB Work Packages**
 - Additional Actions**
 - [Manage TAB Communities](#)

(Continued from previous page, Step 2 of PPF)

Climate Adaption and Mitigation - Planning or Assessment													
Do any planning or assessment activities incorporate strategies to address climate change impacts? Indicate all planning and assessment activities that apply.													
Select Strategy(ies) (check all that apply)		Explanatory Text											
<input type="checkbox"/> N/A <input type="checkbox"/> Adoption of climate-conscious building codes <input type="checkbox"/> Updates to floodplain, coastal and wetland, and /or hazard mitigation plans <input type="checkbox"/> Climate-focussed Phase I and Phase II ESAs <input type="checkbox"/> Evaluate Reuse options that are climate concious <input type="checkbox"/> Identify potential risk factors and infrastructure or utility vulnerabilities <input type="checkbox"/> Other		The property does not incorporate planning or assessment activities to address climate change impacts Building codes can encourage implementation of climate change mitigation and adaptation techniques. Codes may require that infrastructure be planned and built to avoid or minimize future damage from flooding, drought, and other projected weather events resulting from climate changes. Codes may also reduce carbon emissions from commercial and residential buildings by specifying minimum requirements for building components such as insulation, water use, heating and cooling systems, lighting, windows, and ventilation systems. Effective building code requirements may vary regionally due to climate differences. Updated plans should consider the impact of both current and projected climate-related conditions (e.g., sea level rise, proximity to a flood plain, and the frequency and severity of major storm events and droughts) on the long-term safety, stability and suitability of the proposed land reuses. Climate-focussed Phase 1 ESAs may consider current and on-going climate change impacts and consider future impacts to the site or area. For example, an investigation of the site history can include an investigation of site vulnerabilities based on historical and recent climate patterns and events (e.g., floods and drought). Climate-focussed Phase 2 ESAs may include use of renewable energy, incorporating remote sensing capabilities, maximize reuse of existing wells (as appropriate) and/or design wells for future reuse, use of field test kits when possible, use of local laboratories when possible, and use of appropriate sized equipment for the project. Discussion of observed and forecasted climate change conditions and the associated site-specific risk are part of any reuse considerations. Both current and forecasted climate changes may impact the effectiveness of a remedial alternative. Identify potential risk factors and vulnerabilities resulting directly from the impacts of climate change. Possible risk factors and vulnerabilities may include proximity to the ocean, infrastructure vulnerabilities, property affected by a revised FEMA flood plain map, vulnerability related to changes in frequency and intensity of precipitation events, vulnerability of soil type due to moisture and hydraulic changes, and ground and surface drinking water vulnerabilities.											
Please explain in the box provided													
Environmental Cleanup Information													
(Mandatory for Cleanup, Multipurpose, RLF, and State and Tribal Property-Specific Cooperative Agreements; and, if information is available, for Assessment Cooperative Agreements and Targeted Brownfield Assessments)

<input type="checkbox"/> Proprietary Controls (e.g., easements, covenants)		<input type="checkbox"/> Governmental Controls (e.g., zoning, building codes, land use restriction)		
<input checked="" type="checkbox"/> Informational Devices (e.g., state registries, deed notices)		<input type="checkbox"/> Enforcement/Permit Tools (e.g., permits, consent decrees)		
Additional Institutional Controls Information:				
<input type="text" value="Address of Data Source (URL if available)"/>				
Indicate whether Institutional Controls are in place:				
<input type="radio"/> Yes <input type="radio"/> No				
Date Institutional Controls were put in place: <input type="text"/>				
Climate Adaption and Mitigation - Demolition or Cleanup				
Do any demolition or cleanup activities incorporate strategies to address climate change impacts? Indicate all demolition or cleanup activities that apply.				
Select Strategy(es) (check all that apply)				
Explanatory Text				
<input type="checkbox"/> N/A <small>This property does not incorporate planning or assessment activities to address climate change impacts</small>				
<input type="checkbox"/> Reduce energy use and emissions <small>Practices to reduce energy use and emissions may include limiting or eliminating idling of heavy equipment; maximizing use of machinery with advanced emission controls; use of cleaner fuels to power machinery and auxiliary equipment; onsite carbon sequestration (e.g., soil amendments, revegetation); reducing fuel consumption to reduce air emissions; and maximizing use of renewable energy.</small>				
<input type="checkbox"/> Reduce water use and impacts to water sources <small>Practices to reduce water use and impacts to water sources may include minimizing water use and depletion of natural water resources; capturing, reclaiming, and storing water for reuse (e.g., recharge aquifer, drinking water irrigation); minimizing water demand for revegetation (e.g., native species); and employing stormwater best management practice (e.g., installing and maintaining silt fences and basins to capture sediment runoff along sloped areas; use of gravel roads, porous pavement, and separated permeable surfaces to maximize infiltration of rainwater into the soil).</small>				
<input type="checkbox"/> Reduce waste and manage materials sustainably <small>Practices to reduce waste and manage materials sustainably may include minimizing consumption of virgin materials; minimizing waste generation; use of recycled products and local materials; beneficially reusing waste materials (e.g., concrete made with coal combustion products replacing a portion of cement); and segregating and reusing or recycling materials, products, and infrastructure (e.g., soil, construction and demolition debris, buildings).</small>				
<input type="checkbox"/> Sustainable land management practices <small>Sustainable land management practices capitalize on a "whole-site" approach that accelerates cleanup while returning a site to its natural conditions. Practices focus on opportunities to preserve natural land features, maintain open space, sequester carbon, enhance biodiversity, increase wildlife habitat, and minimize surface and subsurface disturbance. Sustainable land management practices at a brownfields site may include minimizing unnecessary soil and habitat disturbance or destruction; use of native species to support habitat; and onsite remediation approaches such as bioremediation and/or phytoremediation.</small>				
<input type="checkbox"/> Other <small>Please explain in the box provided</small>

Climate Adaption and Mitigation - Redevelopment

Do any redevelopment activities incorporate strategies to address climate change impacts? Indicate all redevelopment activities that apply.

Select Strategy(ies) (check all that apply)
Explanatory Text

N/A
This property does not incorporate planning or assessment activities to address climate change impacts

Install green infrastructure
Green infrastructure includes practices and features to reduce the burden of storm events on local water infrastructure. Examples include green roofs, downspout disconnection, urban tree canopies, rainwater harvesting, rain gardens, planter boxes, green parking (permeable pavement), urban agriculture, and community open space.

Incorporate renewable energy development
Renewable energy development may include solar, wind, geothermal and combined heat and power (CHP)

Incorporate green building techniques
Green building is the practice of creating healthier, more resource-efficient models of construction, renovation, operation, maintenance, and demolition. Green building techniques can be instrumental in addressing climate change by more effectively controlling stormwater, reducing waste and emissions, and designing smarter infrastructure that allows for climate adaptation and mitigation. Techniques may include green roofs, energy, lighting, and water efficiencies, use of sustainable building materials, and incorporation of passive survivability features. Passive survivability is a building's ability to maintain habitability without relying on external utility systems for power, fuel, water, or sewer services, as well as being better able to withstand floods, severe weather, and temperature extremes.

Incorporate and encourage multi-modal transit opportunities in redevelopment activities
Planning, designing and building streets that enable access for all users, including pedestrians, bicyclists, motorists and transit riders. Brownfield redevelopment projects can incorporate sidewalks in their plans to allow for pedestrian traffic, outdoor public spaces to encourage community gatherings, and bicycle parking, bike share rentals, and bike trails to encourage biking throughout the community.

COOPERATIVE AGREEMENT RECIPIENT INFORMATION

CA Name: Snake River Tribal Council TST
 CA Number: BF.00TST123
 State or Tribe: Snake River Tribal Council TST

Forms Due: December 17, 2023
 Forms Cover: Fiscal Year 2023

PROGRAM ACTIVITY INFORMATION

1. Select one or more of the following environmental programs where CERCLA Section 128(a) funds were used to support capacity building (general program support, non-site-specific work) in the last federal fiscal year:

Brownfields
 Underground Storage Tanks\Leaking Underground Storage Tanks
 Federal Facilities
 Solid Waste
 Superfund
 Hazardous Waste Facilities
 VCP (Voluntary Cleanup Program, Independent Cleanup Program, etc.)
 Other

2. Number of properties (or sites) enrolled in a response program during the last federal fiscal year:

3. Number of properties (or sites) where documentation indicates that cleanup work is complete AND all required Institutional Controls (ICs) or Engineering Controls (ECs) are in place or not required (during the last federal fiscal year):

4. Total number of acres associated with properties (or sites) identified in number 3 above:

5. Date of the last update to the Public Record:

6. If ICs/ECs have previously been placed on properties (or sites), how many audits, inspections, reviews, or other types of monitoring have been conducted in the last federal fiscal year to ensure that the ICs/ECs are still maintained and fully effective:

7. OPTIONAL – Total number of properties where assistance was provided, but the properties were not enrolled in a response program:

8. Did you develop or revise legislation, regulations, codes, guidance documents or policies related to establishing or enhancing your Voluntary Cleanup Program/Response Program during the most recent fiscal year?

No
 Yes

8a. If yes, please indicate the type and whether it was new or revised:

STEP 3 in Editing a Technical Assistance (TA) Project

Successfully updated TA Funding Specific Information.

1 TA Profile Form Part I: Basic Info and POCs

2 TA Profile Form Part II: Info Specific to Funding Type

3 TA Review & Submit

Please review the changes highlighted in yellow and then **SUBMIT DATA**.

- Data listed under the "DATA FOR REVIEW" column is only that data that has been modified and is to be examined by a Quality Assurance reviewer.
- Data listed under "APPROVED DATA IN ACRES" column is the current information that is stored in ACRES.

(Project is not submitted until the "Submit Data Now" button is clicked: [Jump to Submit Button](#))
