

IMPORTANT: YOU MUST PRINT THESE LABELS IN COLOR
Failure to print labels in color could result in the destruction of your shipment

DIRECTIONS FOR PACKAGING AND SHIPPING LIVING PLANT PESTS, BIOLOGICAL CONTROL ORGANISMS, BEES, NOXIOUS WEEDS, OR PARASITIC PLANTS FOR IMPORTATION UNDER PPQ 526 PERMITS TO THE UNITED STATES.

Unless otherwise instructed in the permit conditions, attach this RED/WHITE label (PPQ 599) securely using clear/transparent tape to the EXTERIOR of each shipping package. Packages without labels on the EXTERIOR may be refused entry even if the labels are enclosed.

Place on the EXTERIOR OF THE PACKAGE the name and address of shipper and a statement of the contents.

THE LABEL WILL DIRECT THE PACKAGE TO THE PPQ PLANT INSPECTION STATION AUTHORIZED UNDER THE PERMIT. THE DELIVERY ADDRESS MUST BE THE SAME AS INDICATED ON THE LABEL OR THE PACKAGE WILL BE REFUSED ENTRY.

EACH HAND CARRY or BORDER CROSSING/SELF TRANSPORT EVENT WILL HAVE AUTHORIZATION AND GUIDANCE IN AN OFFICIAL NOTIFICATION TO U.S. CUSTOMS AND BORDER PROTECTION WITH THE NAMED PERSON AUTHORIZED TO HAND-CARRY.

The package may only contain materials authorized under the PPQ 526 permit. It will be refused entry with possible civil penalties if unauthorized materials are included.

DO NOT WRITE ON, MODIFY, OR DEFACE THESE LABELS. These labels cannot be reused or duplicated for additional shipments. Each individual label will have a distinctive barcode. Underlying packaging/wrapping must carry the address, a prepaid delivery waybill, carrier account number, or postage must be included and any other information required to direct the shipment to its final destination. USDA APHIS does not defray any additional shipping costs for transiting the shipment through an inspection station as the initial US destination.
